DLA Wildfire Equipment Ordering - 2019

ABOUT THE DEFENSE LOGISTICS AGENCY (DLA) WILDFIRE EQUIPMENT PROGRAM.

The program is available to all Department of Forestry and Fire Management (DFFM) Cooperators who have a current Intergovernmental Agreement (IGA).

The catalog items aren't stocked in our facility but are ordered and in most cases shipped direct from DLA Supply Depots.

EQUIPMENT PROGRAM FAQ

- WHO CAN ORDER FROM THIS PROGRAM?

All DFFM Cooperators who have a current Intergovernmental Agreement.

- WHY ORDER FROM THIS PROGRAM?

While not trying to compete with the private sector fire equipment providers, the prices are generally lower. Also, the equipment is part of a National Fire Equipment System (NFES) which means if you damage or destroy a DLA acquired item, it can be replaced on an incident where a Supply Unit has been set up and stocked.

- DO THE PRICES CHANGE FROM WHAT IS IN THE CURRENT CATALOG?

Yes but not often. As prices change the order form price list is updated and posted to the website. Check the date of your order form against the date on the website. Remember there is a 10% handling charge your order. This covers the admin cost of having the program available in Arizona.

- DOES THE PERSONAL PROTECTIVE EQUIPMENT MEET NFPA 1977 STANDARDS?

Yes. Shirts, Pants, gloves, helmets, shrouds, fire shelters all meet the NFPA Standard.

- WHAT IF I ACCIDENTLY ORDER THE WRONG SIZE OR WRONG ITEM? CAN I RETURN IT?

Possibly. If the item must be returned to DLA there is a 25% re-stocking charge. If it's a commonly ordered item, like shirts and pants, we may be able place it in our stock and give you a credit on your total order.

- CAN I ORDER DIRECT FROM GSA ADVANTAGE INSTEAD OF GOING THROUGH DFFM?

In most cases Fire Departments and other entities can order direct but you will need to apply for an account and most likely need a credit card to complete your purchases. There are a few items that are available on both DLA & GSA websites like garbage bags, batteries, fiber & duct tape.

About This Catalog

This Wildland Fire Equipment Catalog is the basic supply publication for use by the U.S. Forest Service (USFS), Bureau of Land Management (BLM), Bureau of Indian Affairs (BIA), U.S. Fish & Wildlife Service (USF&WS), National Park Service (NPS), State and Local governments, and other Forest Service – sponsored participants in the government-wide wildlandfirefighting effort.

This catalog contains descriptions and ordering data for wildland fire protection equipment and supplies managed by DLA. Each item is indexed alphabetically by name and numerically by National Stock Number (NSN) and National Fire Equipment System (NFES) number.

Your suggestions for improving this catalog are invited at all times. Items will be deleted or added as needed, provided they meet the criteria established by DLA, USFS and BLM. Questions or comments should be directed to the DLA WFPP email address at DLAWFPP@dla.mil

Specification References

The specifications cited in catalog descriptions may undergo a series of revisions (indicated by successive suffix letters) to keep current with industry changes and agency needs. Because it is not feasible to show the latest revision on the catalog publication date, only the basic specification is referenced in this catalog. Although NSN items are always procured under the latest edition of a specification in effect at the time of procurement, on-hand stock that was procured under a previous edition of a specification will be issued until the supply is depleted.

About This Catalog

To obtain the most current prices, please check the DFFM website for the latest order form which has the current prices:

Water-Handling Accessories

- Unless otherwise noted, the working pressure of all items under this heading is 600 psi.
- All flow rates are at 100 psi flowing pressure.
- ¾" connections in this catalog use GHT (Garden Hose Thread) threads and 11-1/2 NH threads interchangeably; both designations are the same threads.
- This catalog includes some threads that are specific to the USDA Forest Service and do not follow the NFPA standard. We indicate the threads used on each item.
- The National Fire Protection Association (NFPA) standard calls for ¾" and larger connections to be NH (national standard) threads. The wildland agencies have adopted this, except for ¾" and 1" connections. The ¾" connections shall be ¾" 11-1/2 NH (rather than the NFPA standard of ¾" 7.5 to 8 NH), and 1" shall be NPSH (straight pipe) thread.
- All female connections come with gaskets in place.
- All aluminum-threaded items are hard-coated for durability.

Large New-Generation Fire Shelter

(Taken from TechTips 0551-2325-MTDC, June 2005)

	Regular Fire Shelter (inches)	Larger Fire Shelter (inches)
Length:	86"	96"
Height:	15-1/2"	19-1/2"
Width:	31"	33"
Packed Size:	8-1/2 x 5-1/2 x 4'	9 x 5-1/2 x 4'

How Does the Large Shelter Differ from the Regular Shelter?

The large shelter is longer, wider and taller than the regular shelter and weighs about 0.6 lbs. more. The table above shows the dimensions of both shelters. The large version is recommended for firefighters who are taller than 6' 1" or whose girth is larger than 53". Firefighters shorter than 5' 7" may have difficulty deploying and holding the large shelter down. The large shelter is easily identified by "LARGE" stenciled on the quickdeployment strap. The large shelter's deployment strap is orange rather than yellow, the color of the strap on the regular shelter.
