Arizona's Magnificent Trees

Arizona is home to many amazing natural wonders including our trees and forests. From our sprawling Ponderosa Pine forests, to the largest Fremont Cottonwood in the nation found in Skull Valley, Arizona, to the Jail Tree used to shackle criminals before a prison was built in Wickenburg, Arizona – trees are rooted in Arizona's history and heritage.

The [Arizona Magnificent Tree Program](#), recognizes amazing trees that are the largest of their species (**Champion Trees**), trees that have cultural significance (**Heritage Trees**), and trees that are proven to have been in their same location before Arizona Statehood in 1912 (**Witness Trees**).

The Champion Trees attain their status often as a result of a combination of factors such as growing in a location that has been protected or excluded from major disturbances, trees cared for by people, good soil, plenty of water, excellent genetics, and a little bit of luck.

Trees submitted to the Arizona's Magnificent Tree Program are judged on whether the tree is a Champion by verifying three measurements. Tree measurements include – tree circumference, height, and crown spread. A point score is awarded to each based on these measurements. The point score is calculated by adding **Tree Circumference + Tree Height + ¼ Crown Spread = Total Score**.

In 2023, Arizona recognizes 227 trees on the full Magnificent Tree list. There are 143 Champion trees (including 5 new Co-Champion trees) and 84 Heritage and/or Witness Trees. Volunteers helped us verify 31 trees across the state this year.

We are always looking for more Champions and Heritage Trees waiting to be discovered. Submit your nominations today on this form: [AZ Mag Tree Nominations](#). If you are interested in becoming a Champion Tree Hunter or Volunteer or would like to visit one of our amazing trees please contact the Arizona Magnificent Tree Coordinator at ucf@dffm.az.gov.

Black Locust (*Robinia pseudoacacia*) 2023

AZ0150

This state champ was nominated by George Tallent. It is found in Coconino County. It's distinguished as a member of the Fabaceae (pea) family. These trees support nutrition in other crops (grains, trees). These trees tend to reach 40-100 feet in height!

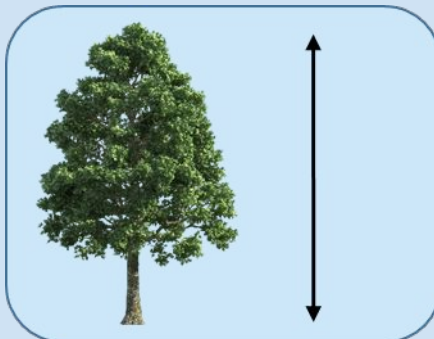

Circumference

84 inches

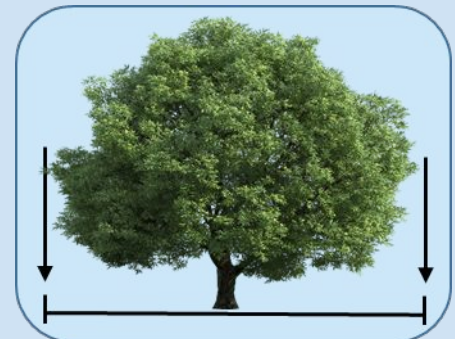

Height

81 feet

AZ0126

This African Sumac Tree found in Pima County at University of Arizona was nominated by James Janecek. These trees are dense shade trees. They are medium-sized. African sumacs are evergreen trees growing with a low branching habit. They are usually 20 to 30 feet tall, while this co-champion is 36 feet tall.

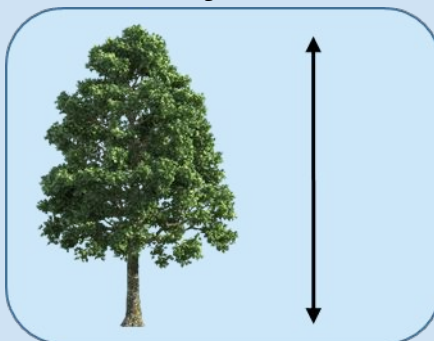

Circumference

135 inches

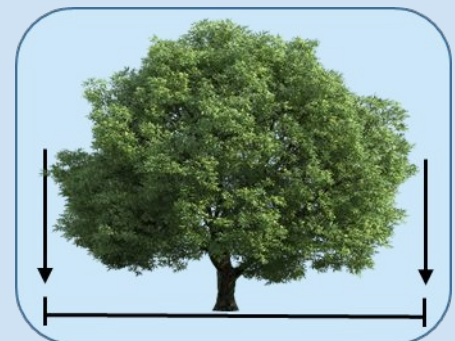

Height

36 feet

Crown Spread

52 feet

- TOTAL SCORE: 184 POINTS -

Lady Banksia Rose (*Rosa banksiae*) 2023

AZ0125

This Lady Banksia Rose tree is found in Cochise County at 4th St was nominated by Mark and Pamela. The trees are big, sprawling, rambling shrubs. They are a part of the rose family, Rosaceae. They have thornless vining branches over 20 feet in length. They are native to central and western China!

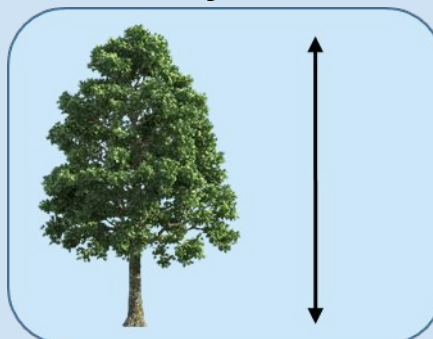

Circumference

150 inches

Height

21 feet

Crown Spread

99 feet

- TOTAL SCORE: 196 POINTS -

Saguaro cactus (*Carnigea gigantea*) 2022

AZ0124

This Saguaro cactus is found in Pinal County close to White Canyon Road and was nominated by Tyler Williams. Saguaro cactus are a columnar cactus and are the largest cactus in the US. Their species name is a reference to its large size. They are usually up to 50 feet tall, while this champion tree is 47 feet tall.

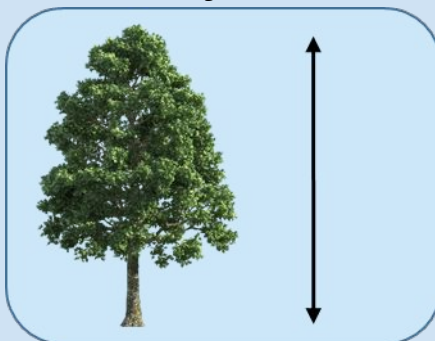

Circumference

90 inches

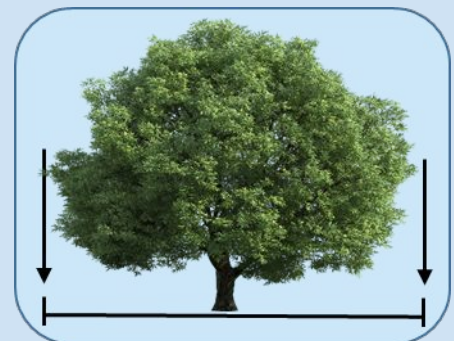

Height

47 feet

Crown Spread

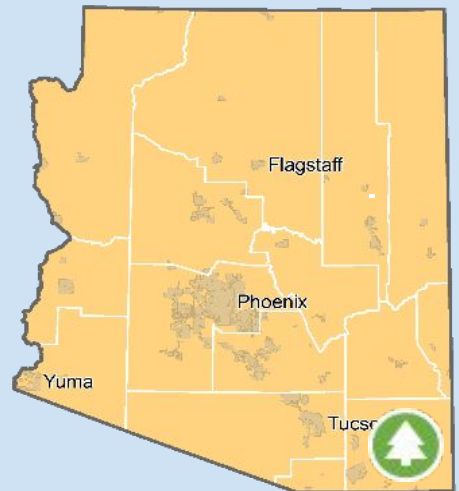

14 feet

- TOTAL SCORE: 141 POINTS -

Arizona Sycamore (*Platanus wrightii*) 2022

5007

This Arizona Sycamore co-champion is found in Pima County at Happy Valley Rd was nominated by Nick Shipley. The co-champion tree is densely branched. The branches are light gray. They also have slightly thorn-tipped branchlets.

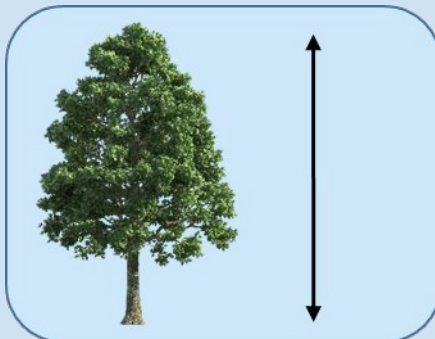

Circumference

430 inches

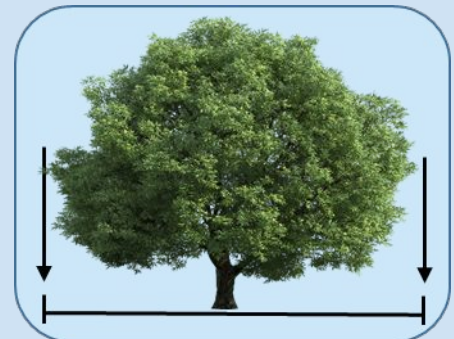

Height

70 feet

Crown Spread

111 feet

- TOTAL SCORE: 528 POINTS -

Southwestern White Pine (*Pinus strobiformis*) 2022 AZ0123

This Southwestern White Pine is found in Pima County at USFS land near Summerhaven and was nominated by Jim "JJ" Janecek. These trees are typically located in a dense area of forest. Southwestern White Pines grow in Arizona, New Mexico, and Southwest Colorado. They are medium-sized. This tree is a co-champion!

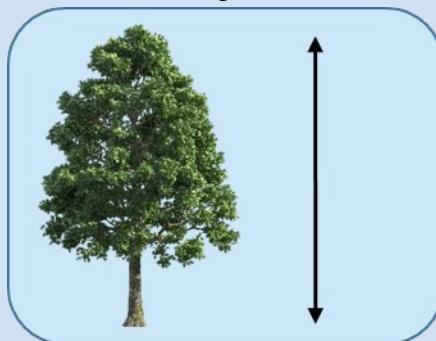

Circumference

149 inches

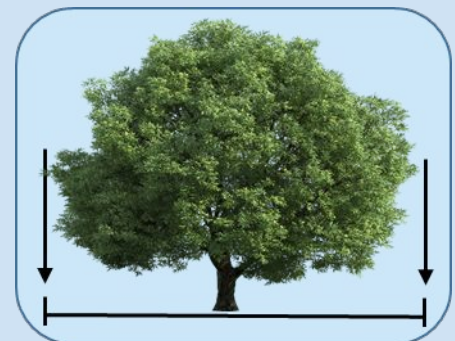

Height

156 feet

Crown Spread

53 feet

- TOTAL SCORE: 318 POINTS -

Southwestern White Pine (*Pinus strobiformis*) 2023 AZ0122

This Southwestern White Pine is found in Gila County at Horton Creek Trail and was nominated by Tyler Williams. These trees are usually located in a dense area of a forest. Southwestern White Pines grow in Arizona, New Mexico, and Southwest Colorado. They are medium-sized. This tree is a co-champion!

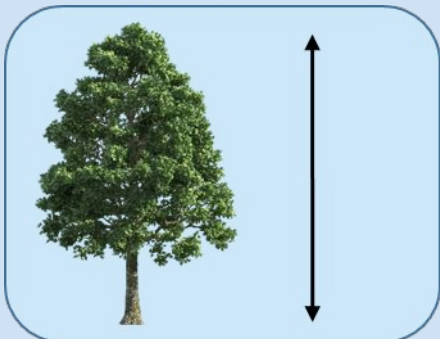

Circumference

156 inches

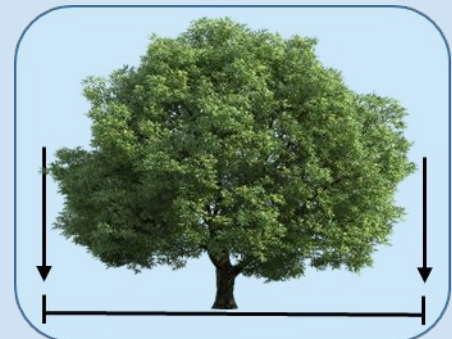

Height

150 feet

Crown Spread

46 feet

- TOTAL SCORE: 318 POINTS -

Southwestern White Pine (*Pinus strobiformis*) 2022 AZ0121

This Southwestern White Pine is found in Pima County at USFS land near Summerhaven and was nominated by Jim “JJ” Janecek. These trees are tough and drought tolerant. Southwestern white pines are often found in mixed-conifer forests, which lets animals have a nice and valuable habitat for the summer. This tree is a champion because of its close but higher score than the other nominations that involve this specific type of tree.
