INTRODUCTION

The Field Manager's Course Guide (FMCG) is designed to provide administrative information concerning the National Wildfire Coordinating Group (NWCG) training curriculum. This document supersedes any other versions of the Guide. It is to be used in conjunction with the "Wildland Fire Qualification System Guide," PMS 310-1. Because this Guide is updated bi-annually it may contradict information set forth within course instructor guides; this Guide supersedes all instructor guides.

Only NWCG-certified training courses and materials are included in this Guide. Information concerning Technical Specialist and agency-derived training packages are not included.

Updates to the FMCG will be incorporated as NWCG training course materials are revised, and the courses will reflect the information in this Guide as well. An "Errata Sheet" is included with each modification to inform field users of the specific changes and the effective date. These pages are maintained in Appendix A.

All course instructors and coordinators are encouraged to use the most current versions of NWCG courses (the year the course was certified is listed on each course page). Old versions may only be taught for six months after a new version is available for order through PMS.

SUBMITTING COMMENTS/RECOMMENDATIONS

Please submit comments or recommendations regarding this Guide by email through your Geographic Area Training Representative or directly to the NWCG Training Development Program at BLM_FA_NWCG_Training@blm.gov. Comments and recommendations will be evaluated and incorporated into the Guide as appropriate. This Guide is updated on a bi-annual basis in the spring and fall.

NWCG TRAINING PROGRAM POSITION ON COURSE PRESENTATION AND MATERIALS

The recommended hours listed in the FMCG are developed by Subject Matter Experts based on their estimation of the time required to present all material needed to adequately teach the unit and course objectives. The hours listed may vary slightly due to factors such as number of students, types and complexity of course activities, and the addition of local materials.

NWCG does not approve of course delivery varying greatly from the recommended course hours. Instructors and students are cautioned that in order to be recognized as an NWCG certified course, certain guidelines must be followed:

- Lead instructors are encouraged to enhance course materials to reflect the conditions, resources and policies of the local unit and area as long as the objectives of the course and each unit are not compromised.
- Exercises can be modified to reflect local fuel types, resources and conditions where the student will be likely to fill incident assignments. The objectives and intent of the exercises must remain intact.
- Test questions may be added that reflect any local information that may have been added to the course. However, test questions in the certified course materials should not be deleted to ensure the accurate testing of course and unit objectives.
- Test grades, to determine successful completion of the course, shall be based only on the questions in the certified course materials.

If lead instructors feel that any course materials are inaccurate, that information should be submitted either by accessing the online [feedback form](https://www.nwcg.gov/course-evaluation-feedback) (<https://www.nwcg.gov/course-evaluation-feedback>) or e-mail to NWCG Training at BLM_FA_NWCG_Training@blm.gov. Materials submitted will be evaluated and, where and when appropriate, incorporated into the appropriate courses.

COURSE LENGTH FOR NWCG COURSES

Recommended course hours and the “NWCG Position on Course Presentation and Materials” above will be adhered to by the course instructors (see below for exception for criteria based courses).

- Unit times represent the allotted time to teach the unit and complete the exercises, simulations, and tests.
- Recommended course hours are given to help the students and the course coordinator with planning travel, room reservations, and facilities usage. This represents the time estimated to present the NWCG provided materials including time for breaks, lunch periods, set-up for field exercises or simulations, etc.
- Actual times for both the unit and the course may vary based on number of students, types and complexity of course activities, and the addition of local instructional materials.

If the course is criteria based, e.g., L-380, and has been developed using NWCG course criteria, minimum course hour requirements have been established and must be adhered to by the course developer and course instructors.

Course hours for all NWCG courses can be found in this Guide. If the hours are a minimum versus recommended they will be stated as such.

COURSE PREREQUISITES

The intent of course prerequisites is to ensure a common standard of knowledge and experience is held by all students. Course Prerequisites are listed for each course within the FMCG. It is recognized that exceptions to the course prerequisites may be necessary to meet specific agency requirements. It is the responsibility of the nominee's supervisor to request and document the exception for consideration on the nomination form prior to submittal. These exceptions will be managed on a case by case basis.

Establishing a Course as a Prerequisite for another Course

To establish a course as a required prerequisite for another course the proposed prerequisite course must be in direct support of an NWCG incident management qualification and be identified in the Wildland Fire Qualification System Guide (PMS 310-1) as a required course. Exceptions will be made on a case by case basis by the NWCG Operations and Training Committee.

Establishing Required Training for Technical Specialist Positions

NWCG does not establish required training for Technical Specialist (THSP) positions; required training for THSP positions is an agency specific determination. However, if all federal wildland fire agencies support the addition of a specific course as required training for a THSP position the required training will be entered under the NWCG setid in IQCS.

NWCG COURSE EQUIVALENCY GUIDELINES

An equivalent course is determined by agency identified “evaluators” (at the national/state level) to be equal to a NWCG approved course.

Awarding course equivalency is an agency specific responsibility. Only agencies have the authority to certify their employees meet NWCG training requirements when alternative course offerings are used. Individual agencies will set guidelines for equivalency determination and may grant credit for courses they deem equivalent.

Courses being reviewed for equivalency must have:

- A reason the alternative course was used or developed;
- A benefit gained through awarding course equivalency such as:
 - cost savings
 - broadened target audience
 - enhanced learning experience for students

The agency seeking course equivalency should conduct a detailed analysis and document their findings according to agency policy.

When conducting this analysis, the following guidelines apply:

- All learning and performance objectives of the NWCG course are met or exceeded in the equivalent course;
- The same minimum instructor qualifications required for the NWCG course apply to the equivalent course;
- Course prerequisites have not been altered;
- The equivalent course does not conflict or contradict established NWCG guidelines or standards;
- The equivalent course is not numbered using the NWCG course numbering system.

A new analysis must be completed when the equivalent NWCG course is revised to ensure course equivalency continues.

NWCG INTERCHANGEABLE COURSE GUIDELINES

Courses that have been developed jointly with an interagency all-hazard subject matter expert group, and contain the same learning objectives and content, may be deemed “interchangeable” by the NWCG. Interchangeable courses do not require equivalency determination by each agency and may have multiple course codes/numbers. Interchangeable courses will be incorporated into IQCS/IQS and credit will be given for the NWCG course.

FEMA NATIONAL INCIDENT MANAGEMENT SYSTEM (NIMS) TRAINING

NWCG recognizes the following FEMA NIMS courses:

- ICS-100 (IS100), Introduction to ICS
- ICS-200 (IS200.b), Basic ICS
- ICS-300 (G/E/L300), Intermediate ICS
- ICS-400 (G/E/L400), Advanced ICS
- IS-701, NIMS Multiagency Coordination System (MACS)
- IS-700, NIMS: An Introduction
- IS-800, NFR: An Introduction
- E/L950, Incident Commander (NWCG requires S-300 prior to attending this course)
- E/L952, Public Information Officer (NWCG requires S-203 prior to attending this course)
- E/L956, Liaison Officer
- E/L964, Situation Unit Leader
- E/L965, Resources Unit Leader
- E/L967, Logistics Section Chief
- E/L970, Supply Unit Leader
- E/L973, Finance/Administration Section Chief
- E/L975, Finance/Administration Unit Leaders

Additional information on the use of the FEMA NIMS Training Program can be found at <https://www.nwcg.gov/fema-nims-training>.

NWCG INSTRUCTOR CERTIFICATION

The following standards have been developed to help improve the quality and availability of qualified instructors. Separate standards have been developed for:

- Lead and Unit instructors of 100 and 200 level courses (see below)
- Adjunct, Lead and Unit instructors of 300-600 level courses (see table on following page)

Instructor Criteria for 100-200 Level Courses

All 100-200 level instructors must meet one of the following criteria:

- Qualified and current (minus Work Capacity Test and Annual Fireline Safety Refresher) in any required positions identified as an instructor prerequisite for the course description in the NWCG Field Manager's Course Guide.

OR

- Written approval by Course Coordinator to instruct a specific unit or technical portions of a unit or units.

100 level instructors: No additional instructor training requirements beyond those set forth in the Field Manager's Course Guide for each particular course.

200 level instructors:

Lead instructors are required to meet both "Unit Instructor – Teaching Skills" and "Lead Instructor – Teaching Skills" portion "Instructor Criteria for 300-600 Level NWCG Courses." See attached table.

Unit instructors should have 32 hours of acceptable formal instructional training (i.e., State fire training certificate, college teacher's credential, college education courses, Facilitative Instructor (M-410) course, etc.)

Decertification of Instructors:

Instructor certification is a privilege, not a right. Whenever a questionable situation arises, the case will be reviewed by the appropriate course or training center coordinator (Reviewing Official). If it is determined that the individual instructor has performed poorly during one or more courses, the Reviewing Official can recommend to the official that certified the individual as an instructor (Certifying Official) that their certification be withdrawn for a specific course, group of courses or all courses. If the individual is a contractor, performance below those standards identified in a contract may be cause for nonpayment or voiding the contract and the Contracting Officer shall be consulted and be involved in the final disposition. Decertification shall remain in place until the problem has been remedied. Decertification should include removal from active instructor list(s) in IQCS.

Recertification of Instructors:

The Certifying Official shall determine, in consultation with the Reviewing Official, the requirements to regain certification. Recertification is the responsibility of the Certifying Official or body managing the instructor's certification.

Exceptions for Lead Instructor Qualifications:

Exceptions to the lead instructor qualifications may be granted by the host agency(s) on a case by case basis. Instructors that are not currently qualified in the position(s) called for in the instructor criteria, but, who hold a higher qualification in the same functional area, and have been certified in the position in the past may be granted lead instructor status.

NWCG L-curriculum course instructors for L-380 and above are subject to the requirements and certification process identified on the [NWCG L curriculum courses \(https://www.fireleadership.gov/courses/courses.html\)](https://www.fireleadership.gov/courses/courses.html) webpage. Approved lead instructors are identified at <https://www.nwcg.gov/committees/leadership-subcommittee/resources>.

Instructor Criteria for 300-600 Level NWCG Courses

Certification based on ability to meet one standard in each Instructor Criteria.

INSTRUCTOR CRITERIA

Instructor Level	Teaching Skill	Course Content Knowledge	Practical Application	Ethics Criteria
Adjunct Instructor (per FMCG)	None	Known or demonstrated expertise on one or more subjects associated with the course	Subject Matter Expert on course related materials OR Demonstrated course related technical expertise OR Published subject related article or paper in previous 5 years	As required by Agency
Unit Instructor	Accepted formal instructional training (i.e., State fire training certificate, college teacher's credential, college education courses, Facilitative Instructor (M-410) course, etc.) OR 40 hours of successful fire service instruction	Successful completion or audit of course being taught OR Successfully assisted in instructing the course OR Successfully completed Train-the-Trainer course (if applicable) and Successfully taught the course in the past 5 years as determined by the Course Coordinator	Qualified and current (<i>minus Work Capacity Test (WCT) and Annual Fireline Safety Refresher</i>) as required in the course page of NWCG Field Manager's Course Guide (FMCG) OR Qualified and current (<i>minus WCT and Refresher</i>) one level above that identified in the course outline of FMCG OR Qualified as a type 1 or 2 level Command or General Staff position in the same functional area as the course being presented OR Meets the NIMS Training Program instructor criteria for specific course (supplemented by the NIMS ICS All-Hazards Position Specific Training Program: Administrative Guidelines). NOTE: Written approval of an NWCG member Regional or State Fire Director can be substituted for currency requirement above.	As required by Agency
Lead Instructor	Same as Unit Instructor AND 40 additional hours (80 total hrs) of successful fire service instruction	Same as Unit Instructor	Same as Unit Instructor	As required by Agency

INSTRUCTOR DEFINITIONS

A “qualified instructor” means the instructor meets the position currency requirements as described in the Wildland Fire Qualification System Guide, PMS 310-1. Instructors are not required to meet physical fitness and annual refresher requirements to be considered qualified.

Certification of instructor qualifications is the responsibility of the employing agency. See previous table and refer to courses within this Guide for specific instructor requirements.

The NWCG has established the following general instructor requirements and levels:

Instructor Levels

- Lead instructors (300-600 level courses) - Oversee presentation of the entire course and assure course objectives are met in accordance with those criteria listed in the most recent Field Manager’s Course Guide and/or Course Introduction. The lead instructor must meet the certification criteria listed in the table above. They should have sufficient experience in presenting all units of the course to be capable of last-minute substitution for unit instructors. It is recognized that exceptions may occur where courses are of such a technical nature that no one person may be technically competent to instruct all units.
- Unit instructors are responsible for successful presentations of one or more units and should be experienced in the lesson content they are presenting.
- Adjunct instructors may be utilized to provide limited instruction in specialized knowledge and skills at the discretion of the lead instructor. They must be experienced, proficient, and knowledgeable of current issues in their field of expertise.

COURSE LEVEL DESCRIPTIONS

The first digit of a course number designates the complexity level at which the course is designed to be presented and also indicates the organizational level at which the course should be given.

Entry Level

100 = \
Local entry-level skills development
200 = /

Mid-level

300 = \
Mid-level and/or geographic area level management skills
400 = /

Advanced Level

500 = \
Advanced/national level management skills
600 = /

The NWCG Training Development Program will assign the appropriate complexity/organizational level designation to the course. Assignments are based on the formula listed above, the analysis of the project development team, the target group, the recommendations from the project leader, and input from other NWCG entities that may be involved.

Current exceptions to the established course numbering protocol include the following courses:

- S-341, GIS Specialist for Incident Management
The NWCG Geospatial Training Unit (GTU) has oversight and maintenance responsibility for this course. The GTU steering committee manages all offerings and maintains the lead/unit instructor cadre roster. Geographic Areas who wish to offer this course must contact the Geospatial Training Unit Chair for support.
- S-495, Geospatial Fire Analysis, Interpretation, and Application
The National Advanced Fire and Resource Institute (NAFRI) has oversight and maintenance responsibility for this course. It is coordinated and taught by a national cadre/steering committee.
- M-581, Fire Program Management
NAFRI has oversight and maintenance responsibility for this course, but course schedules and instructors are determined by geographic area training coordinators.

TESTING STANDARDS

The standard for passing an NWCG course is a score of at least 70 percent. The instructor guides will identify the evaluation criteria for each course. Some courses may use course components (pre-course tests, unit tests, class participation, final exams), to aggregate the passing score. The passing score is based on the final exam unless otherwise stated.

USE OF NWCG CERTIFICATES

Students successfully completing a NWCG course sponsored by a NWCG member agency will receive a NWCG certificate (for a list of member agencies go to <https://www.nwcg.gov>).

Educational institutions, contractor associations, and non-member agencies may issue the NWCG course certificate if their lead instructor is an authorized representative of an NWCG member agency OR they have a formal agreement established with a NWCG member agency. All students are encouraged to keep their course certificates as proof of attendance.

COURSE COMPONENTS CHART DEFINITIONS

Pre-selection assessment – An assessment that must be passed before admittance into the course

Pre-course work – Work that is accomplished before beginning the course

Online training – Required course materials that are delivered online

Instructor-led training – Required course materials that are delivered by an instructor

Blended learning – Learning events that combine online and instructor-led training

JOB AIDS

Job aids are “how to” books that assist an individual in performing specific tasks associated with a position. They may be used by an individual in a trainee position, who has met all of the prerequisites, but has not completed the position task book for that position. After the individual has become qualified, the book can be used as an aid or refresher in doing the job.

The performance based system stipulates that an individual must complete a Position Task Book prior to becoming qualified for that position. Refer to the Wildland and Prescribed Fire Qualification System Guide, PMS 310-1 for the established standards for this position.

J-158 Radio Operator (2002)

The radio operator reports to the incident communications center manager. Subjects covered: developing a kit; mobilization; briefing from supervisor; duties within the incident communications unit structure; work materials and equipment; transfer of information; communications equipment and basic functions/capabilities; processing documentation, emergency situation protocols; transition with replacement personnel; demobilization.

J-236 Staging Area Manager (2013)

The staging area manager is responsible to the operations section chief, branch director, or division group supervisor for managing all activities within the staging area. Subjects covered: materials needed for kit; mobilization; briefing from operation section chief; organizing and staffing; factors for suitable staging area; operating a staging area; demobilization.

J-252 Ordering Manager (2003)

The ordering manager reports to the supply unit leader. Subjects covered: materials needed for a kit; mobilization; briefing from the supply unit leader; establishing ordering procedures; receiving written requests for supplies and resources; establishing ordering channels; maintaining filing system; reconciling resource orders; notifying the receiving and distribution manager of placed orders; briefing subordinate and relief personnel; coordinating with appropriate personnel; reports required by the supply unit leader; evaluating performance of subordinate personnel; demobilization.

J-253 Receiving and Distribution Manager (2003)

The receiving and distribution manager reports to the supply unit leader. This position is responsible for supervising recorders, assistants, tool and equipment specialists, and tool attendants. Subjects covered: materials needed for kit; mobilization; briefing from supply unit leader; organizing supply area; procedures for receiving supplies and equipment; procedures for issuance and tracking of supplies; notifying ordering manager of supplies received; maintaining inventory; supervising the receiving and distribution unit; briefing subordinates and relief personnel; coordinating with appropriate personnel; reports required by the supply unit leader; evaluating performance of subordinates; excess resources and supplies; demobilization.

J-254 Base/Camp Manager (2004)

The base/camp manager reports to the facilities unit leader. This position may be assigned to manage facilities at a base, isolated camp, helibase, staging area, R&R center, hotel/motel or incident command post if it is not co-located with the incident base. Subjects covered: materials need for kit; mobilization; briefing from facilities unit leader; obtaining necessary resources and supplies; coordinating to establishing incident facilities; communicating with incident personnel; supervision of incident facility personnel; compliance with health and safety regulations; maintenance for facility equipment; coordination with finance/administration; maintaining a unit log; demobilization.

J-255 Equipment Manager (2004)

The equipment manager reports to the ground support unit leader. Depending on the equipment manager's functional area, they supervise bus drivers, dispatchers, inspectors, dozer operators, parking attendants, drivers, mechanics, and flaggers. Subjects covered: materials need for kit; mobilization; briefing from ground support unit leader; determining needed equipment and supplies; safety measures; maximizing use of resources; dispatching equipment; determining resources on hand; maintaining equipment use records; establishing areas for service, repair and fueling; maintaining documentation; developing and implementing incident traffic plans; maintenance of incident roads; demobilization.

J-257 Incident Communications Center Manager (2003)

The incident communication center manager reports to the communications unit leader. Subjects covered: materials needed for kit; mobilization; briefing from communications unit leader; establishing the incident communications center; assisting communications unit leader with duties; supervising the incident communications center; maintaining a unit log; evaluating performance of subordinates; demobilization.

J-259 Security Manager (2004)

The security manager is in the logistics section of the ICS organization. This position is responsible for clarifying the authority and jurisdiction of the security group. Working outside the limits of this authority and jurisdiction may leave the security personnel, incident management team, and the agency liable for civil or criminal prosecution. Subjects covered: materials need for kit; mobilization; briefing from supervisor; establishing contacts; contacting agency representatives; security sizeup; security plan document; requesting personnel; handling sensitive issues; briefing incident personnel; safety and welfare of assigned staff; documentation; demobilization.

J-342 Documentation Unit Leader (2008)

The planning section chief supervises the documentation unit leader. The documentation unit leader is responsible for maintaining accurate and complete incident files, which includes packaging files for legal, analytical, and historical purposes. Subjects covered: mobilization; briefings; organization of work area; supervision of unit; establishing and organizing incident files; maintaining incident records; providing duplication and collation services; providing incident action plan preparation and copying services; retention guidelines; producing final documentation package; demobilization.

D-110, EXPANDED DISPATCH RECORDER

2007

16 hrs

Course Description

This course provides students with the skills to perform as an expanded dispatch recorder (EDRC). Topics include the structure of the expanded dispatch organization, description of resource ordering and statusing process, and the importance of the EDRC having effective communication skills and working relationships. The final is a 4-hour, scenario-based exercise where students will complete resource order forms based on timed inputs and supplemental handouts. A Reference Guide at the end of Unit 3 contains reference documents for students to use during the course and when on assignment. The course gives a very general overview of Resource Ordering and Statusing System (ROSS) – it does not teach students how to use ROSS.

Objectives

- Describe the purpose and structure of expanded dispatch.
- Describe the role and responsibilities of the expanded dispatch recorder.
- Demonstrate how to mobilize and demobilize incident resources using established dispatch ordering channels and resource order forms.
- Describe how to communicate effectively and foster positive interpersonal working relationships.

Course Components and Hours to Complete

Pre-selection assessment	N/A
Pre-course work	N/A
Online training	N/A
Instructor-led training	16
Total Hours	16

Target Group

Individuals who have no previous training or experience in the dispatch function and who will be called on as needed to assist in the expanded dispatch organization.

Minimum Instructor Qualifications

Lead instructor must be a qualified expanded dispatch support dispatcher (EDSD).

Unit instructors must be qualified as expanded dispatch recorder (EDRC).

Also see NWCG Instructor Certification at the beginning of this Guide.

Course Prerequisites

None

Course Level

Local

Course Description

This course is designed to prepare students to accomplish the duties and responsibilities of an expanded dispatch support dispatcher (EDSD). Through hands-on exercises that utilize the Resource Ordering and Status System (ROSS), students will organize, plan, and implement a dispatch area to meet the needs of the incident(s); follow established policies and procedures using resource orders and supplemental forms, to mobilize, reassign, and demobilize resources; and demonstrate the ability to respond to changing priorities and situations.

Objectives

- Plan, organize, and implement a functional area to meet the needs of the incident.
- Demonstrate the ability to interact with other functional areas in an incident support organization.
- Follow set established policies and procedures, utilize resource orders and supplemental forms to mobilize, reassign, and demobilize resources.
- Demonstrate the ability to respond to changing priorities and situations within a functional area.

Course Components and Hours to Complete

Pre-selection assessment	5-6
Pre-course work	1-2
Online training	N/A
Instructor-led training	32-34
Total Hours	38-42

Target Group

Personnel desiring to be qualified as expanded dispatch support dispatcher (EDSD).

Minimum Instructor Qualifications

Lead instructor must be a qualified initial attack dispatcher (IADP) or expanded dispatch supervisory dispatcher (EDSP).

Unit instructors must be qualified as expanded dispatch support dispatcher (EDSD).

Also see Instructor Certification at the beginning of this Guide.

Course Prerequisites

Qualified as an expanded dispatch recorder (EDRC).

Satisfactory completion of pre-course work and pre-selection assessment.

Course Level

Regional, state or area

D-311, INITIAL ATTACK DISPATCHER

2005

32 hrs

Course Description

This course is designed to provide a consistent knowledge and skill base for the initial attack dispatcher (IADP). The concepts taught in this course will help an IADP perform at an acceptable level on a national basis without regard to geographic boundaries. The course is a mix of lecture/discussion, group exercises, and simulation. Students will have the opportunity to practice new skills in the exercise and simulation portions of the class.

Objectives

At the completion of the course, students will have the necessary information to:

- Dispatch multiple resources to an incident using standard procedures.
- Identify the common roles of an IADP in the initial attack dispatch environment.
- Practice multitasking and prioritizing actions in a realistic situation.

Course Components and Hours to Complete

Pre-selection assessment	N/A
Pre-course work	N/A
Online training	N/A
Instructor-led training	32
Total Hours	32

Target Group

Initial attack dispatchers desiring to be available for national mobilization (across geographic area boundaries).

Minimum Instructor Qualifications

The lead instructor must be either an assistant center manager with initial attack experience or a supervisory dispatcher (EDSP) with initial attack experience.

Unit instructors must be qualified as initial attack dispatcher (IADP).

Also see NWCG Instructor Certification at the beginning of this Guide.

Course Prerequisites

Successful completion of Basic Firefighter (S-130) and Introduction to Wildland Fire Behavior (S-190). Qualified as dispatch recorder (EDRC).

Course Level

Regional, state, or area

D-312, AIRCRAFT DISPATCHER

2009

34-40 hrs

Course Description

This course is designed to provide a consistent knowledge and skill base for the aircraft dispatcher (ACDP). The concepts taught in this course will help an ACDP perform at an acceptable level on a national basis without regard to geographic boundaries. This course is a mix of lecture/discussion, group exercises, and simulation. Students will have the opportunity to practice new skills in the exercise and simulation portions of the class.

Objectives

The objective of D-312 is to provide students with the knowledge and skills needed to become effective ACDP trainees. In achieving this objective, students can expect to be able to:

- Identify the common roles of the aircraft dispatcher in the aviation environment.
- Dispatch aviation resources using standard procedures.
- Describe the safety procedures that relate to aircraft dispatching.

Course Components and Hours to Complete

Pre-selection assessment	N/A
Pre-course work	2-4
Online training	N/A
Instructor-led training	32-36
Total Hours	34-40

Target Group

Aircraft dispatchers desiring to be available for national mobilization.

Minimum Instructor Qualifications

The lead instructor must be either an assistant center manager with initial attack experience or a supervisory dispatcher (EDSP) with aircraft experience.

Unit instructors must be qualified as aircraft dispatcher (ACDP).

Also see NWCG Instructor Certification at the beginning of this Guide.

Course Prerequisites

Qualified as dispatch recorder (EDRC).

Satisfactory completion of pre-course work.

Course Level

Regional, state, or area

D-510, EXPANDED DISPATCH SUPERVISORY DISPATCHER

NAFRI (currently offered every other year on the even years)

72 hrs

Course Description

This course is designed to train individuals in the function and responsibilities of a Supervisory Dispatcher within an Incident Support Organization. Students selected for this course must be capable of performing as an Expanded Dispatch Support Dispatcher in all functional areas of an expanded dispatch organization. The course will provide trainees with a working knowledge of the necessary management skills and operational procedures for successful performance as a Supervisory Dispatcher. The course is intended to be an interactive experience, requiring students to interact with the materials, the faculty, and fellow students. The course consists of a 40-hour pre-course test, discussions, exercises and final exam. It is designed to take 32 hours to present. Class size is limited to 40 students.

Objectives

Given an incident situation, a briefing from the appropriate agency management entity, and incident objectives, students will be able to:

- Develop and manage an effective organization to meet present and future needs of an incident.
- Utilize available information to establish expanded dispatch priorities in consultation with the appropriate agency management entity.

Course Components and Hours to Complete

Pre-selection assessment	40
Pre-course work	N/A
Online training	N/A
Instructor-led training	32
Total Hours	72

Target Group

Individuals who will be called upon to establish and supervise an expanded dispatch organization and who have met prerequisite training and experience at the expanded dispatch support dispatcher (EDSD) level.

Minimum Instructor Qualifications

Nationally recognized subject matter experts serve as instructors in this course.

Course Prerequisites

Qualified as expanded dispatch support dispatcher (EDSD). Recommend experience in all functional areas (overhead, crews, equipment, aircraft and supply).

Successfully complete a pre-course pass/fail assessment that takes approximately 40 hours to complete. The pre-course test will be available on the NAFRI Web site.

Success in D-510 will depend on the student's ability in leadership and organizational knowledge as contained in the Fireline Leadership (L-380), Intermediate ICS (ICS-300), Expanded Dispatch Support Dispatcher (D-310), and agency-specific supervision courses.

Aircraft Dispatcher (D-312) is highly recommended.

Course Level

National

For current course information, refer to the NAFRI Web site at <https://www.nafri.gov>.

FI-110, WILDLAND FIRE OBSERVATIONS AND ORIGIN SCENE PROTECTION FOR FIRST RESPONDERS

2005

6 hrs

Course Description

The primary emphasis of this course is to teach sound wildland fire observations and origin scene protection practices that enable first responders to a wildland fire scene to perform proper origin scene protection procedures. The course is presented by short lectures, electronic presentations, exercises, and class discussion.

Objectives

- List various causes of wildland fires and their cause indicators.
- Perform the basic procedures and techniques needed to provide witness/observer information to fire investigators.
- Identify and protect wildland fire origin areas.

Course Components and Hours to Complete

Pre-selection assessment	N/A
Pre-course work	N/A
Online training	N/A
Instructor-led training	6
Total Hours	6

Target Group

Recommended training for all first responders, including single resource bosses, law enforcement officers, prevention technicians, and field resource personnel.

Minimum Instructor Qualifications

Cadre must have experience in wildland fire investigation.

Also see NWCG Instructor Certification at the beginning of this Guide.

Course Prerequisites

None

Course Level

Local

Course Description

The primary purpose of this course is to provide a consistent knowledge and skill base for the wildland fire investigator (INVF). The concepts taught in this course will help an INVF perform at an acceptable level on a national basis without regard to geographic boundaries. The course is presented by lectures, electronic presentations, field exercises, and class discussion.

Objectives

- Perform the common roles and responsibilities of an INVF involved in an initial investigation environment.
- Practice wildland fire investigation methods, evidence collection and documentation processes in a realistic environment.
- Identify the laws, regulations and related court procedures associated with administrative, civil and criminal litigation processes.
- Describe the fundamentals of investigation.
- Know the elements of professional code of ethics.

Course Components and Hours to Complete

Pre-selection assessment	1
Pre-course work	1
Online training	N/A
Instructor-led training	36
Total Hours	38

Target Group

Recommended training for experienced fire personnel and law enforcement officers with wildland fire investigation responsibilities.

Minimum Instructor Qualifications

Lead and unit instructors must be qualified as wildland fire investigator (INVF) and should have actual hands-on experience to teach participants the duties of this position without regard for the type of incident.

Also see NWCG Instructor Certification at the beginning of this Guide.

Course Prerequisites

Recommend students have law enforcement or firefighter experience. An interactive, self-paced pre-course work will familiarize students with the background information necessary to successfully complete the course.

Satisfactory completion of pre-selection assessment.

Satisfactory completion of pre-course work.

Course Level

Local

Course Description

This course provides an introduction into the law enforcement case development of major wildland arson, including serial arson. Students are instructed in strategies and tactics to combat serial wildland arson and work in groups to develop a case plan and presentation based on an actual wildland arson case. Course includes extensive pre-course work reading, exercises, and a test.

Due to the sensitive nature of the materials in this course, the course is being maintained by the Wildland Fire Investigation Subcommittee. See Roster for contact information.

Objectives

- Demonstrate a comprehensive knowledge of administrative and management functions related to the investigation of complex wildland fire cases.
- Given a case file, the student will use his or her knowledge of advanced investigation methodology to analyze the data and properly identify any strengths and weaknesses associated with the case; determine necessary follow-up actions; and make assignments based on the analysis.
- Review existing case file information and develop an investigative strategy that includes proper staffing and organizational structure; a written investigation plan; and an Incident Action Plan.
- Identify and apply specific investigative strategies and administrative functions associated with the management of a complex serial arson investigation team or task force.
- Prepare, collect, organize and disseminate all relevant investigative data.

Course Components and Hours to Complete

Pre-selection assessment	2
Pre-course work	13
Online training	N/A
Instructor-led training	36
Total Hours	51

Target Group

Personnel desiring to be qualified as wildland fire investigation team members (INTM).

Minimum Instructor Qualifications

The lead and instructors must be qualified as wildland fire investigator (INVF) and have successfully completed Wildland Fire Investigation: Case Development (FI-310).

Also see NWCG Instructor Certification at the beginning of this Guide.

Course Prerequisites

Qualified as wildland fire investigator (INVF).

Satisfactory completion of pre-selection assessment.

Satisfactory completion of pre-course work.

Course Level

Regional, state, or area

G-131, WILDLAND TRAINING (FFT1) FOR STRUCTURAL FIREFIGHTERS

9 hrs

Course Description

This course is designed to provide wildland firefighting skills (Firefighter Type 1) to structural firefighters who meet NFPA 1001 for structural firefighter 2 or equivalency. **It is not available as a pre-packaged course.** Instructors are required to assemble the Materials Required for Course Presentation below and teach according to the Course Outline. In order to receive credit for passing the course, students are required to pass the final exam contained on the S-131 CD.

Objectives

At the completion of this course structural firefighter will:

- Accurately use navigation tools and maps to identify location.
- Describe the sizeup elements in a fire situation.
- Identify position responsibilities and demonstrate the ability to apply principles of Operational Leadership found in the Incident Response Pocket Guide (IRPG; PMS 461).
- Demonstrate the ability to apply tactical decision making procedures.

Course Components and Hours to Complete

Pre-selection assessment	N/A
Pre-course work	N/A
Online training	N/A
Instructor-led training	9
Total Hours	9

Target Group

Personnel who meet NFPA 1001 for structural firefighter type 2, and are qualified as wildland firefighter type 2 (FFT2), desiring to be qualified as wildland firefighter type 1 (FFT1).

Minimum Instructor Qualifications

Lead and unit instructors must be qualified single resource boss.

Unit instructors must be qualified as firefighter type 1 (FFT1).

Also see NWCG Instructor Certification at the beginning of this Guide.

Course Prerequisites

Structural firefighters who meet NFPA 1001 for structural firefighter type 2 and are qualified as wildland firefighter type 2 (FFT2).

Course Level

Local

Materials Required for Course Presentation

- PMS 475 Basic Land Navigation (pdf document) available online at <https://www.nwcg.gov/publications/475>
- S-131, Firefighter Type 1 CD (NFES #2792)

Course Outline

Unit	Title	Learning Objective	NWCG Source
0	Course Introduction	<ol style="list-style-type: none"> 1. Introduce course coordinator, instructors and students. 2. Discuss course logistics. 3. Provide a course overview. 4. Discuss course expectations. 5. Identify course reference materials. 6. Discuss position responsibilities. <p><i>Note: In addition to presenting the information in the Course Introduction, instructors should explain where the G-131 course fits in the Gap course curriculum and the NWCG credentialing system.</i></p>	S-131 Unit 0 (.5 hrs) Oct 2016 version
1	Navigation Tools and Maps	<ol style="list-style-type: none"> 1. Accurately use navigation tools and maps to identify location. 	Basic Land Navigation (PMS 475) – self-study (1 hr) https://www.nwcg.gov/publications/475
2	Position Responsibilities and Fireline References	<ol style="list-style-type: none"> 1. Identify position responsibilities of Firefighter Type 1 (FFT1). 2. Demonstrate the ability to locate and apply standard wildland fire operating procedures found in the Incident Response Pocket Guide (IRPG) and other identified fireline references. 	S-131 Unit 1 (1 hr) Oct 2016 version
3	Sizeup Considerations	<ol style="list-style-type: none"> 1. Describe the sizeup elements in a fire situation. 2. Identify the four fuel groups and describe expected fire behavior in each. 3. Determine the tactics to be used after sizeup occurs. 	S-231 Unit 3 (1.5 hrs) May 2004 version
4	Decision Making	<ol style="list-style-type: none"> 1. Demonstrate the ability to apply the Risk Management Process in a changing environment. 2. Demonstrate the ability to assess resource capabilities. 3. Demonstrate the ability to develop tactical and logistical plans. 4. Demonstrate the ability to engage tactically through sand table exercises, locally based sand table exercises (STEX), do a staff ride, or do a paper based exercise of choice. 	S-131 Unit 5 (4 hrs) October 2016 version
	Final Exam		S-131 Final Exam

Course Description

This course is designed to provide wildland firefighting skills (Engine Boss, Single Resource) to structural firefighter drivers, operators, engineers or company officers who meet NFPA 1021 for fire officer 1 or equivalency. **It is not available as a pre-packaged course.** Instructors are required to assemble the Materials Required for Course Presentation below and teach according to the Course Outline. In order to receive credit for passing the course, students are required to pass the final exams contained on the S-230 and S-290 CDs (or online for S-290).

Objectives

At the completion of this course structural fire officers will:

- Describe the characteristics of fuel, weather, and topography that influence wildland fire behavior.
- Describe the effect that fuels, weather, and topography have on wildland fire behavior, fireline tactics, and safety.
- Describe the causes of extreme fire behavior (long-range spotting, crowning, and fire whirls) that develop relative to fuels, weather, and/or topography.
- Describe crew boss responsibilities prior to and during mobilization, on the incident, and during demobilization.
- Identify the hazards and risks on various incidents and describe how to mitigate them.
- Describe tactics that are appropriate to wildland fire situations and procedures and implement them through the chain of command.

Course Components and Hours to Complete

Pre-selection assessment	N/A
Pre-course work	N/A
Online training	N/A
Instructor-led training	42
Total Hours	42

Target Group

Structural firefighter drivers, operators, engineers or company officers who meet NFPA 1021 for fire officer 1, desiring to be qualified as engine boss, single resource (ENGB).

Minimum Instructor Qualifications

Lead and unit instructors must be a qualified strike team leader engine (STEN) or task force leader (TFLD).

Unit instructors must be qualified as engine boss, single resource (ENGB).

Also see NWCG Instructor Certification at the beginning of this Guide.

Course Prerequisites

Structural firefighter drivers, operators, engineers or company officers who meet NFPA 1021 for fire officer 1, are qualified as wildland firefighter type 1 (FFT1), and who have taken G-131.

Course Level

Local

Materials Required for Course Presentation

- S-230, Crew Boss (Single Resource) CD (NFES #002812)
 - S-290, Intermediate Wildland Fire Behavior CD (NFES # 002892)
- Option: have students complete the online S-290 course accessible at <https://onlinetraining.nwcg.gov/>
- *If completing S-290 online, total hours will be shortened to approximately 27 hours.

Course Outline

Unit	Title	Learning Objective	NWCG Source
1	S-290 Intermediate Wildland Fire Behavior	<ol style="list-style-type: none">1. At the completion of this course structural fire officers will:2. Describe the characteristics of fuel, weather, and topography that influence wildland fire behavior.3. Describe the effect that fuels, weather, and topography have on wildland fire behavior, fireline tactics, and safety.4. Describe the causes of extreme fire behavior (long-range spotting, crowning, and fire whirls) that develop relative to fuels, weather, and/or topography. <p><i>Note: In addition to presenting the information in the Course Introduction, instructors should explain where the G-231 course fits in the Gap course curriculum and the NWCG credentialing system.</i></p>	S-290 Units 1-12 (32 hrs) Nov 2007 version
2	Mobilization	<ol style="list-style-type: none">1. Identify the readiness and special equipment items that are required for the Crew Boss.2. List eight pieces of information to request from dispatch prior to departure.3. Identify five key elements of information needed to complete a Passenger/Cargo manifest.4. Explain the importance of evaluating crew readiness and establishing crew organization.5. Provide examples of appropriate travel procedures and conduct.	S-230 Unit 2 (1 hr) Nov 2004 version
3	Fireline Operations: Entrapment Avoidance	<ol style="list-style-type: none">1. Describe the role LCES has in the risk management process.2. Describe a protocol for negotiating a perceived unsafe assignment.3. Given a set of fireline conditions, identify valid trigger point(s).4. Define levels of engagement.5. Describe a procedure for recognizing escape routes and safety zones when engaging a fire.	S-131 Unit 1 (1 hr) Oct 2016 version

Unit	Title	Learning Objective	NWCG Source
		<ol style="list-style-type: none"> Given a set fireline condition, estimate minimum safety zone size using the Missoula Fire Lab model. Identify human factors that contribute to fireline decision errors. Given a fire scenario, determine the appropriate level of engagement as conditions change. 	
4	Fireline Operations: Safety and Tactics	<ol style="list-style-type: none"> Demonstrate the proper use of LCES in the fire environment in relation to the Crew Boss role. Organize, plan, and describe the actions that are required when a crew is deployed for fireline suppression activities. Given an Incident Response Pocket Guide, safely complete a simulated fireline assignment. Describe safety precautions that should be addressed by the Crew Boss in downhill and indirect fireline construction. Describe applicable methods to employ in fireline construction that will facilitate rehabilitation. List the items to check when inspecting a completed fireline. List crew procedures used in staging areas. Describe Crew Boss responsibilities for accidents, injuries, and near misses. Identify supply needs and explain the process for re-supplying a crew while on the fireline. Complete an After Action Review (AAR). 	<p>S-230 Unit 4C (4 hrs) Nov 2004 version</p>
5	Demob	<ol style="list-style-type: none"> Describe procedures for re-supply of fire expended items. List the steps necessary for the demobilization of a crew from an incident. List the key responsibilities of a Crew Boss prior to disassembly of crew at the initial mobilization point. 	<p>S-230 Unit 6 (1 hr) Nov 2004 version</p>
	Final Exam		<p>S-230 & S-290 Final Exams</p>

Course Description

This course is designed to provide wildland firefighting skills (Strike Team Leader Engine) to experienced lieutenants, captains, or chief officers who meet NFPA 1021 for fire officer 2 or equivalent. **It is not available as a pre-packaged course.** Instructors are required to assemble the Materials Required for Course Presentation below and teach according to the Course Outline. In order to receive credit for passing the course, students are required to pass the final exams contained on the S-215 and S-330 CDs.

Objectives

At the completion of this course structural fire officers will:

- Demonstrate the ability to apply the Risk Management Process found in the Incident Response Pocket Guide (IRPG) to various incidents.
- Demonstrate the ability to apply appropriate tactics with assigned resources organized into strike teams or task forces.
- Describe how to safely and effectively operate in a wildland/urban interface incident when performing structure triage using strategy and tactics unique to the wildland/urban interface environment.

Course Components and Hours to Complete

Pre-selection assessment	N/A
Pre-course work	N/A
Online training	N/A
Instructor-led training	11.5
Total Hours	11.5

Target Group

Structural firefighter lieutenants, captains, and chief officers, who meet NFPA 1021 for fire officer 2, desiring to be qualified as wildland strike team leader, engine (STEN).

Minimum Instructor Qualifications

Lead and unit instructors must be a qualified division group supervisor (DIVS).

Unit instructors must be qualified as strike team leader, engine (STEN) or task force leader (TFLD).

Also see NWCG Instructor Certification at the beginning of this Guide.

Course Prerequisites

Structural firefighter lieutenants, captains, and chief officers, who meet NFPA 1021 for fire officer 2, are qualified as wildland single resource, engine boss (ENGB), and who have taken G-131 and G-231.

ICS-100, INTRODUCTION TO ICS

On October 1, 2014 the NWCG version (I-100) of this course was removed from the NWCG Products Management System. In lieu of the NWCG course, NWCG recognizes the FEMA training course available through the Emergency Management Institute. Additional information on accessing FEMA courses and the FEMA NIMS Training Program can be found at <https://www.nwcg.gov/fema-nims-training>.

ICS 100 NWCG Minimum Instructor Qualifications

There is no national instructor database for the ICS courses as there is for the all-hazards position specific courses. For classroom delivery, instructors must have successfully completed ICS 200 and must have incident experience.

Also see Instructor Certification at the beginning of this Guide.

ICS-200, BASIC ICS: ICS FOR SINGLE RESOURCES AND INITIAL ACTION INCIDENTS

On October 1, 2014 the NWCG version (I-200) of this course was removed from the NWCG Products Management System. In lieu of the NWCG course, NWCG recognizes the FEMA training course available through the Emergency Management Institute. Additional information on accessing FEMA courses and the FEMA NIMS Training Program can be found at <https://www.nwcg.gov/fema-nims-training>.

ICS 200 NWCG Minimum Instructor Qualifications

There is no national instructor database for the ICS courses as there is for the all-hazards position specific courses. For classroom delivery, instructors must have successfully completed ICS 300, must have specialized knowledge and experience appropriate for the audience, and must be qualified at the initial attack incident commander (ICT4), single resource boss, or unit leader level.

Unit instructors must have successfully completed ICS 200.

Also see Instructor Certification at the beginning of this Guide.

ICS-300, INTERMEDIATE ICS: ICS FOR SUPERVISORS AND EXPANDING INCIDENTS

On October 1, 2014 the NWCG version (I-300) of this course was removed from the NWCG Products Management System. In lieu of the NWCG course, NWCG recognizes the FEMA training course available through the Emergency Management Institute. Additional information on accessing FEMA courses and the FEMA NIMS Training Program can be found at <https://www.nwcg.gov/fema-nims-training>.

ICS 300 NWCG Minimum Instructor Qualifications

There is no national instructor database for the ICS courses as there is for the all-hazards position specific courses. Lead instructor must have successfully completed ICS 400.

Unit instructors must have successfully completed ICS 300.

All instructors must have served as an incident commander (type 3 or above) or in a command and general staff position on an incident that required a written incident action plan – OR – must have specialized knowledge and experience appropriate for the audience.

Also see Instructor Certification at the beginning of this Guide.

ICS-400, ADVANCED ICS: ICS FOR SUPERVISORS AND EXPANDING INCIDENTS

On October 1, 2014 the NWCG version (I-400) of this course was removed from the NWCG Products Management System. In lieu of the NWCG course, NWCG recognizes the FEMA training course available through the Emergency Management Institute. Additional information on accessing FEMA courses and the FEMA NIMS Training Program can be found at <https://www.nwcg.gov/fema-nims-training>.

ICS 400 NWCG Minimum Instructor Qualifications

There is no national instructor database for the ICS courses as there is for the all-hazards position specific courses. All instructors must have successfully completed ICS 400, and must have served as an incident commander (type 3 or above) or in a command and general staff position on an incident that required a written incident action plan.

Also see Instructor Certification at the beginning of this Guide.

Course Description

This training course is designed for unit-level supervisors to use when delivering orientation training to new crewmembers. The stand-alone training package is available in the NWCG Publication Management System. An adapted version is included as Unit 4 in the 2003 edition of S-130, Firefighter Training. Presentation of the course involves a few short lecture segments, but the primary content is delivered by video and supported with small group exercises. Topics include situational awareness, basic communication responsibilities, attitude and stress barriers, decision making process, and teamwork principles.

Objective

- Students will demonstrate an understanding of their responsibilities to address human performance issues so they can integrate more effectively into crews/teams operating in high-risk, dynamic work environments.

Course Components and Hours to Complete

Pre-selection assessment	N/A
Pre-course work	N/A
Online training	N/A
Instructor-led training	4
Total Hours	4

Target Group

Entry-level incident personnel.

Minimum Instructor Qualifications

Lead instructor must be qualified as any single resource boss.

Unit instructors must have a supervisory qualification in any ICS function (operations or support).

Also see NWCG Instructor Certification at the beginning of this Guide.

Course Prerequisites

None

Course Level

Local

Course Description

The L-180, Human Factors in the Wildland Fire Service, online course exposes students to human performance concepts as part of basic wildland firefighter training. The course is specifically designed for entry-level operational personnel; however, this course also applies to all wildland fire service personnel, including non-operational personnel.

At the end of the online course, students will be able to practice decision-making skills in an interactive simulation as a member of a fire crew, and students will apply their Human Factors knowledge to a variety of scenarios. Throughout the simulation, students will answer questions and make decisions regarding situation awareness and hazard identification, decision making, and team cohesion. Responses are tracked, and then reported at the end of the activity.

Objectives

- Introduce human performance factors in high-risk work environments and add this knowledge to student's skill set.
- Provide opportunities to explore human performance concepts and the related vocabulary.
- Reinforce professional responsibility to address human performance issues while on the job.

Course Access and Additional Course Information

Can be found at <https://www.nwcg.gov> under the Training and Qualifications dropdown.

Course Description

This training course is designed as a self-assessment opportunity for individuals preparing to step into a leadership role. The course combines one day of classroom instruction followed by a second day in the field with students working through a series of problem solving events in small teams (Field Leadership Assessment Course). Topics include leadership values and principles, transition challenges for new leaders, situational leadership, team cohesion factors, ethical decisionmaking, and after action review techniques. Some course delivery may be arduous in nature.

Objectives

- Students will demonstrate an understanding of fundamental leadership principles.
- Students will assess their individual traits and motivation for entering into a leadership role.

Course Components and Hours to Complete

Pre-selection assessment	N/A
Pre-course work	4
Online training	N/A
Instructor-led training	16

Course Description

This is a leadership development training recommendation for unit supervisors. The training should be designed to provide at least 50% of the delivery time as exercises and simulations. Some approved course packages may be arduous in nature. Low student-to-instructor ratios are necessary for successful exercise/simulation-based training delivery. A dedicated cadre of at least three instructors is recommended for a class size of 20-25 students.

THIS IS NOT A COURSE PACKAGE AVAILABLE IN THE NWCG PUBLICATION MANAGEMENT SYSTEM.

The NWCG Leadership Subcommittee has oversight and maintenance responsibility for the L-380 criteria and evaluation process. However, the delivery process used to meet this training recommendation will need to be determined by the hosting agency. Specific course information can be found at the Wildland Fire Leadership Web site at <https://www.fireleadership.gov/courses/courses.html>.

Selected course material should address these topics:

- Application of leadership styles
- Communicating vision and intent
- Team building
- Detecting operational error
- Managing stress

Objective

- The intent of this training recommendation is to provide unit supervisors with the tools to build and maintain effective and cohesive crews/teams.

Course Components and Hours to Complete

Pre-selection assessment	N/A
Pre-course work	8
Online training	N/A
Instructor-led training	32
Total Hours	40

Target Group

Personnel desiring to be qualified as strike team leader or unit leader.

Minimum Instructor Qualifications

All lead instructors must be certified by the NWCG Leadership Subcommittee. The combined cadre must have career backgrounds and expertise in principle-centered leadership, emergency incident operations, human factors, and decision making.

All instructors must be able to execute field simulations, role-playing, and classroom exercises.

Course Prerequisites

Incident personnel with supervisory responsibilities.

Successful completion of Human Factors in the Wildland Fire Service (L-180).

Satisfactory completion of pre-course work.

Course Level

Regional, state, or area

Course Description

This is a leadership development training recommendation for incident response personnel who will function in fireline command roles. The training should be designed to provide at least 50% of the delivery time as exercises and simulations. Low student-to-instructor ratios are necessary for successful exercise/simulation-based training delivery. A dedicated cadre of at least three instructors is recommended for a class size of 18-25 students.

THIS IS NOT A COURSE PACKAGE AVAILABLE IN THE NWCG PUBLICATIONS MANAGEMENT SYSTEM.

The NWCG Leadership Subcommittee has oversight and maintenance responsibility for the L-381 criteria and evaluation process. However, the delivery process used to meet this training recommendation will need to be determined by the hosting agency. Specific course information can be found at the Wildland Fire Leadership Web site at <https://www.fireleadership.gov/courses/courses.html>.

Selected course materials should address these topic areas:

- Command presence/climate
- Leader's intent
- Command and control
- Rapid team building
- Communication techniques
- Detecting and mitigating error
- Operational tempo awareness

Objective

- The intent of this training recommendation is to provide future leaders of divisions, groups, and type 3 incidents with the leadership tools to effectively exert command and control over a quickly assembled team in a time constrained and rapidly changing incident environment.

Course Components and Hours to Complete

Pre-selection assessment	N/A
Pre-course work	8
Online training	N/A
Instructor-led training	32
Total Hours	40

Target Group

Personnel desiring to be qualified as division/group supervisor (DIVS) or incident commander type 3 (ICT3).

Minimum Instructor Qualifications

All lead instructors must be certified by the NWCG Leadership Subcommittee. The combined cadre must have career backgrounds and expertise in principle-centered leadership, emergency incident operations, human factors, and decision making.

All instructors must be able to execute field simulations, role-playing, and classroom exercises.

Course Prerequisites

Qualified as any strike team leader, task force leader (TFLD), incident commander type 4 (ICT4), any support unit leader, or supervisory dispatcher.

Successful completion of Human Factors in the Wildland Fire Service (L-180).

Satisfactory completion of pre-course work.

Course Level

Regional, state, or area

Course Description

This is a leadership development recommendation that will provide mid- and upper-level organizational leaders and future Incident Management Team leaders (Command and General Staff) with the leadership tools to provide strategic direction and influence others to achieve team goals.

THIS IS NOT A COURSE PACKAGE AVAILABLE FROM THE NWCG PUBLICATIONS MANAGEMENT SYSTEM.

The NWCG Leadership Subcommittee has oversight and maintenance responsibility for the L-480 criteria and evaluation process. However, the delivery process used to meet this training recommendation will need to be determined by the hosting agency. Specific course information can be found at the Wildland Fire Leadership Web site at <https://www.fireleadership.gov/courses/courses.html>.

Selected course materials should address these topics:

- Communication skills
- Command presence
- Situational awareness, vision and change
- Leadership skills within a team environment
- Recognition and reward
- Mentorship, coaching and delegation

Objective

The intent of this training recommendation is to develop personal leadership skills and command presence to increase effectiveness in the workplace and during incident management operations.

Course Components and Hours to Complete

Pre-selection assessment	N/A
Pre-course work	8
Online training	N/A
Instructor-led training	32
Total Hours	40

Target Group

Personnel desiring to be qualified as Type 2 command and general staff, and mid- to upper-level organizational leaders.

Minimum Instructor Qualifications

See L-480 Instructor and Coach Qualifications at the Wildland Fire Leadership Web site.

Course Prerequisites

Successful completion of Fireline Leadership (L-380).

OR

Successful completion of Incident Leadership (L-381).

OR

Successful completion of Human Factors in the Wildland Fire Service (L-180) plus completion of 40 hours in any supervision or leadership training course(s).

AND

Satisfactory completion of pre-course work.

Course Level

Regional, state, or area

Course Description

This is a leadership development recommendation that focuses on leadership within the context of large/complex incident management, to include team collective tasks and functions accomplished by large Incident Management Teams (IMTs). Individual tasks include functioning as a productive member of a staff organization, being a positive contributor to staff decision making, maintaining a common operating picture, demonstrating staff member ethos, and projecting operational culture and leader's intent.

THIS IS NOT A COURSE PACKAGE AVAILABLE FROM THE NWCG PUBLICATIONS MANAGEMENT SYSTEM.

The NWCG Leadership Subcommittee has maintenance responsibility for the L-481 course package and evaluation process. However, the delivery process used to meet this training recommendation will need to be determined by the hosting agency. Specific course information can be found at the Wildland Fire Leadership Web site at <https://www.fireleadership.gov/courses/courses.html>.

Selected course materials should address these topics:

- Establishing a staff value system, team culture, and command presence
- Developing and maintaining a team-level common operating picture
- Developing and communicating leader's intent through a critical thinking process
- Propagating intent at all levels of the incident organization
- Effectively operate in the ICS system and utilize ICS products and doctrine
- Promoting integration of functional areas and a high-level of teamwork into strategic planning

Objective

The intent of this training is to produce command and general staff members who can fulfill the responsibilities of an effective staff officer or section chief within an IMT, contribute effectively to an IMT's decision making process, and perform as an effective organizational leader in their own functional area and as a member of the IMT.

Course Components and Hours to Complete

Pre-selection assessment	N/A
Pre-course work	8
Online training	N/A
Instructor-led training	32
Total Hours	40

Target Group

Incident personnel, qualified in any command or general staff position at the Type 2 or 3 level and Type 2 command and general staff trainees.

Minimum Instructor Qualifications

See the L-481 Instructor and Cadre Qualifications at the Wildland Fire Leadership Web site at <https://www.fireleadership.gov/courses/courses.html>

Course Prerequisites

Organizational Leadership in the Wildland Fire Service (L-480)

OR

Fireline Leadership (L-380)

OR

Incident Leadership (L-381)

OR

Human Factors in the Wildland Fire Service (L-180) plus completion of 40 hours in any supervision or leadership training course(s)

Completion of pre-course work assignment.

Course Level

Regional, state, or area

L-580, LEADERSHIP IS ACTION

NAFRI

Hours will vary

Course Description

This is a continuing education opportunity available to senior fire management leaders. The intent is to foster exchange of knowledge and experience in the art of leading during high-risk and complex incidents.

THIS IS NOT A COURSE PACKAGE AVAILABLE FROM THE NWCG PUBLICATIONS MANAGEMENT SYSTEM. Specific course information can be found at the Wildland Fire Leadership Web site <https://www.fireleadership.gov/courses/courses.html>.

NAFRI is the coordinator for the L-580 events. Specific delivery information can be obtained from the NAFRI L-580 Course Coordinator at <https://www.nafri.gov/>.

Selected course materials should address these topics:

- Focus on leadership actions, decision-making, and critical thinking at the strategic level
- Include structured facilitation of interactive group discussions and/or activities
- Involve pre- and/or post-study activities related to the specific event

Objective

L-580 provides senior-level leaders with a variety of L-580 Steering Committee-approved continuing education opportunities that complement other Incident Management Organization training.

Course Components and Hours to Complete

Pre-selection assessment	N/A
Pre-course work	Varies
Online training	N/A
Instructor-led training	Varies
Total Hours	Varies

Target Group

Senior-level leaders and decision makers, including, but not restricted to, Agency Administrators and Incident Management Organizations (Type 1, Type 2, Area Command, and NIMO).

Minimum Instructor Qualifications

This course is managed by the L-580 National Steering Committee.

Course Prerequisites

Previous attendance at other L-courses is highly recommended.
Satisfactory completion of pre-course work.

Course Level

National

Course Description

This training course is designed to help students become effective facilitative instructors. The purpose of this course is to improve training delivery and quality by presenting instructional methods with an emphasis on student-oriented adult training techniques. This course is designed for students to meet NWCG instructor requirements.

Objective

Demonstrate effective facilitative instructor skills while giving three classroom presentations.

Course Components and Hours to Complete

Pre-selection assessment	N/A
Pre-course work	1
Online training	N/A
Instructor-led training	35
Total Hours	36

Target Group

Personnel who will be instructing NWCG courses.

Minimum Instructor Qualifications

Lead instructor must have taught or observed all units of this specific course and have the knowledge to assume a substitution role as a unit instructor.

Unit instructors must be experienced in the lesson content they are presenting and must have been previous students in this or an equivalent course.

Also see NWCG Instructor Certification at the beginning of this Guide.

Course Prerequisites

Satisfactory completion of pre-course work.

Course Level

Regional, state, or area

Course Description

Through lectures, case studies, a field trip, and interaction between students and faculty, the course will:

- Explore the role of fire and fire management in ecosystem management.
- Examine historical, social, political, legal, economic, and environment factors critical to fire management.
- Provide the students with concepts, technologies and methods to actively engage in ecosystem management across the landscape.

Objectives

- Convey the significant role of fire management across a diversity of ecosystems.
- Demonstrate the complexity and benefits of integrating fire and landscape management with social, political, legal, economic and environmental factors.
- Provide students with strategies, concepts, reference resources, and models to facilitate ecosystem management decisions.
- Reinforce fundamental ecological concepts as they relate to fire on the landscape.

Course Components and Hours to Complete

Pre-selection assessment	N/A
Pre-course work	N/A
Online training	N/A
Instructor-led training	40
Total Hours	40

Target Group

Resource managers, wildland fire planning personnel and line officers who want to enhance their knowledge and understanding of fire management and fire ecology.

- Natural and cultural resource management specialists, endangered species biologists, compliance specialists (NEPA, SHPO), land, fire and fuels management planners. Individuals involved with planning, implementation, and monitoring of fire and ecosystem management programs.
- Public affairs, information officers, education and other specialists or individuals who need to communicate to diverse audiences fire management and ecological principles and practices.
- Agency administrators, (i.e., line officers) senior managers, Staff Officers, Tribal leaders, and other key partners. (i.e., community leaders, local government, state officials, non-government partners, et cetera.)
- Fire Management Officers and Assistant Fire Management Officers.

Minimum Instructor Qualifications

This course is managed by a National Steering Committee. Nationally recognized subject matter experts and practitioners serve as instructors in this course.

Course Prerequisites

None

Course Level

National

For additional course information refer to NAFRI Web site at <https://www.nafri.gov>.

Course Description

This course was developed using a **blended approach** to learning, meaning that it contains a mix of online and instructor-led training (ILT). This training course is designed to meet the needs of current and future unit level Fire Program Managers. It is intended to aid in the application of fire management principles in sound decision making, business management, human resource management, administrative functions, use of state-of-the-art tools and methods in fire management programs, and recognition of the necessity for personal accountability required in fire program management.

Objective

Upon successfully completing M-581, Fire Program Management, students will be able to identify the principles, policies and procedures to effectively and safely lead, plan, and implement a Fire Management Program. Students will be able to identify the program management, reporting, and personal accountability responsibilities of the Fire Program Manager.

Course Components and Hours to Complete

Pre-selection assessment	N/A
Pre-course work	N/A
Online training	18-24
Instructor-led training	32-36
Total Hours	50-60

Target Group

Current or future Fire Program Managers who have direct responsibility to plan, organize, budget, manage and evaluate Fire Management Programs (e.g. fire operations supervisor, battalion chief, assistant fire management officer, IHC superintendent, helicopter crew supervisor, unit aviation manager, lead dispatcher, dispatch center manager, fuels specialist). This course is intended for students that have managed portions of a fire program, and are prepared to make the transition to overall fire program management.

Minimum Instructor Qualifications

Nationally recognized subject matter experts and practitioners serve as instructors in this course. Course schedules and instructors are determined by geographic area training coordinators. Also see NWCG Instructor Certification at the beginning of this Guide.

Course Prerequisites

It is recommended students obtain the competencies provided in Fireline Leadership (L-380), Introduction to Fire Effects (RX-310) and Intermediate ICS (ICS-300) prior to attending this course.

Course Level

National

For additional course information, refer to the NAFRI Web site at <https://www.nafri.gov>.

Course Description

This course was developed as part of a multi-course national curriculum covering wildfire prevention and is designed to enhance basic skill and knowledge of personnel assigned responsibilities for wildfire prevention. It was significantly revised and updated in 2007.

Objectives

To develop the skills and knowledge necessary to perform the field applications of the basic fundamentals of wildland fire prevention.

- Wildland Fire Prevention Administration
- Wildland Fire Prevention Education
- Wildland Fire Prevention Engineering
- Wildland Fire Prevention Enforcement
- Summary and Testing

Course Components and Hours to Complete

Pre-selection assessment	N/A
Pre-course work	N/A
Online training	N/A
Instructor-led training	32
Total Hours	32

Target Group

Designed to provide a basic introduction of fire prevention principles and activities for fire prevention specialists, fire managers, public information officers and others who have wildland fire prevention, education, or mitigation responsibilities.

Minimum Instructor Qualifications

Instructors must have a wide range of wildfire prevention experience to facilitate group and class interaction and discussion.

Also see NWCG Instructor Certification at the beginning of this Guide.

Course Prerequisites

None

Course Level

Local

Course Description

This course is designed for fire prevention and education program leaders and fire program managers with wildland fire prevention, education and mitigation responsibilities. The course promotes a collaborative planning process in developing an effective and efficient fire prevention and education program at the local, state, tribal, regional or national program level. Topics include: assessment, planning, the collaborative process, communication, and monitoring accomplishments. This course is an intermediate course in the wildland fire prevention training curriculum.

Course Goal

Students will acquire knowledge and skills to collaboratively develop fire prevention and education plans with stakeholders at the local, state, tribal, regional, or national level.

Objective

The student will acquire knowledge and skills necessary to plan a long-term fire prevention and education program with the objective of reducing the risks, hazards, and losses to people, communities, and resources from wildland fire.

Course Components and Hours to Complete

Pre-selection assessment	N/A
Pre-course work	N/A
Online training	N/A
Instructor-led training	32
Total Hours	32

Target Group

Fire prevention and education program leaders and fire program managers with wildland fire prevention, education and mitigation responsibilities.

Minimum Instructor Qualifications

Instructors must be fully competent in wildland fire prevention planning procedures and have a wide range of wildfire prevention experience.

Also see NWCG Instructor Certification at the beginning of this Guide.

Course Prerequisites

It is recommended students take Fire Prevention Education 1 (P-101) prior to attending P-301.

Course Level

Local

Course Description

This intermediate level course was developed as part of a multi-course national curriculum covering wildland fire prevention and is designed to enhance the skills and knowledge needed for personnel to participate on a National Fire Prevention and Education Team (NFPET).

Objectives

To develop the skills and knowledge necessary to perform, in the field, as a member of a NFPET.

- Organization
- Mobilization
- Components of a NFPET assignment
- Bringing “it” all together
- Make “it” happen

Course Components and Hours to Complete

Pre-selection assessment	N/A
Pre-course work	N/A
Online training	N/A
Instructor-led training	32
Total Hours	32

Target Group

Designed to provide intermediate level fire prevention principles and activities and provide references for personnel wanting to serve as a member of a NFPET. It is also useful for fire prevention specialists, fire managers, public information officers and others who have wildland fire prevention, education, or mitigation responsibilities or who may host a NFPET.

Minimum Instructor Qualifications

All instructors must have a wide range of wildfire prevention experience.
Also see NWCG Instructor Certification at the beginning of this Guide.

Course Prerequisites

None

Course Level

Regional, state, or area

Course Description

This mid-level course was developed as part of a multi-course national curriculum covering wildland fire prevention and is designed to enhance the skills and knowledge needed for personnel to lead a National Fire Prevention and Education Team (NFPET).

Objectives

To develop the skills and knowledge necessary to perform as the field leader of a NFPET.

- Team Organization
- Developing National Fire Prevention and Education Teams
- NFPET Qualifications and Certifications
- Program Management
- NFPET Activities
- NFPET Closeout

Course Components and Hours to Complete

Pre-selection assessment	N/A
Pre-course work	N/A
Online training	N/A
Instructor-led training	32
Total Hours	32

Target Group

Designed to provide mid-level fire prevention principles and activities and provide references for personnel wanting to serve as a leader of a NFPET. It is also useful for fire prevention specialists, who serve as team members (PETM) and desire to become team leader trainees, eventually becoming qualified as a team leader (PETL).

Minimum Instructor Qualifications

Lead and Unit instructors must be qualified as fire prevention education team leader (PETL). Also see NWCG Instructor Certification at the beginning of this Guide.

Course Prerequisites

Qualified as prevention education team member (PETM).

Course Level

Regional, state or area

RT-130, ANNUAL FIRELINE SAFETY REFRESHER TRAINING

Annual

Length is determined by Agency Policy

Course Description

Annual Fireline Safety Refresher Training should be designed to provide up to date fireline safety information to employees holding Incident Command System qualifications requiring this training per the PMS 310-1, Wildland Fire Qualification System Guide. Individual sessions of Annual Fireline Safety Refresher Training should contain content pertinent to the registered students.

Objectives

There are four core components to the Annual Refresher Training which include:

- **Entrapment Avoidance** – Use training and reference materials to study the risk management process as identified in the Incident Response Pocket Guide (IRPG) as appropriate to participants, e.g., LCES, Standard Firefighting Orders, Watch Out Situations, Wildfire Decision Support System direction, Fire Management Plan priorities.
- **Current Issues** – Review and discuss current topics which could be based on the new modules or areas of concern identified by your agency or geographic area. Review forecasts and assessments for the upcoming fire season and discuss implications for firefighter safety.
- **Fire Shelter** – Review and discuss last resort survival including escape and shelter deployment site selection. Conduct “hands-on” fire shelter inspections. Practice shelter deployments in applicable crew/module configurations. Wearing fireline personal protective equipment during fire shelter practice can enhance the learning experience for students.
- **Other Hazards and Safety Issues** – Choose additional hazard and safety subjects, which may include SAFENET, current safety alerts, site/unit specific safety issues and hazards.

Course Components and Hours to Complete

Pre-selection assessment	N/A
Pre-course work	N/A
Online training	N/A
Instructor-led training	Varies
Total Hours	Varies

Recommended Resources

- [Wildland Fire Safety Training Annual Refresher](https://www.nifc.gov/wfstar) (<https://www.nifc.gov/wfstar>) Web site
- [Experiential Training](https://www.fireleadership.gov) (<https://www.fireleadership.gov>)
- [Wildland Fire Lessons Learned Center](http://www.wildfirelessons.net/home) (<http://www.wildfirelessons.net/home>) Web site

Target Group

Personnel holding Incident Command System qualifications that require annual fireline safety refresher training per the PMS 310-1, Wildland Fire Qualification System Guide.

Minimum Instructor Qualifications

- Lead instructor must be a qualified single resource boss.
- Unit instructors must be qualified as firefighters type 1 (FFT1).
- Adjunct instructors may be utilized to provide limited instruction in specialized knowledge and skills at the discretion of the lead instructor. They must be experienced, proficient and knowledgeable of current issues in their field of expertise.
- Instructors must have the knowledge and skills to utilize current educational technology, as it relates to the WFSTAR Web site. Examples would be streaming and downloading interactive videos as well as the use of apps and mobile devices.

Course Prerequisites

None

Course Level

Local

Course Description

The single engine air tanker manager (SEMG) workshop is designed to provide the attendee with current policy revisions, technical updates, changes in reference materials and operational procedures, and an overall review of safety and security issues associated with the single engine air tanker program.

Objectives

- Review the duties and responsibilities of the SEMG manager.
- Use risk management techniques to perform tasks safely.
- Update and maintain SEAT management skills.
- Understand changes to aviation policy and how they apply to SEAT management.
- Review changes in the retardant contract, approved products list and updates with the quality assurance program.

Course Components and Hours to Complete

Pre-selection assessment	N/A
Pre-course work	N/A
Online training	N/A
Instructor-led training	12-16
Total Hours	12-16

Target Group

Qualified and trainee SEMG managers.

Minimum Instructor Qualifications

Lead and unit instructors must be current or previously qualified as single engine air tanker manager (SEMG).

Also see NWCG Instructor Certification at the beginning of this Guide.

Course Prerequisites

Qualified or trainee as single engine air tanker manager (SEMG).

Course Level

Local

Core elements of a refresher will include the following:

- **National Season Review**
This section generally covers year end statistical information like total flight hours, gallons delivered, contacts awarded, CWN/Exclusive Use stats, highlights of what worked well during the season, and areas needing improvement.
- **New Year Outlook**
This section generally covers any new technical updates, new contract numbers, new long and short term program changes.
- **AMD Contracting Updates**
This section lists the tentative changes that will be made to both the CWN and Exclusive Use contracts.
- **ISOG Updates**
The section covers the revisions in policy for the new ISOG.
- **Reference Material Updates**
This section covers any new updates, changes, additions to any of the reference materials designed for the SEAT program like the Interagency SEAT Operations Handbook, BLM National SEAT Web site, SEMG Workshop Refresher training.
- **Safety Review**
This section covers a summary of SAFECOMS that were filed pertaining to SEAT operations, any Safety Alert or Bulletins issued for the SEAT program, and highlights of any safety concerns or issues that surfaced within the season.
- **Security Review**
This section covers any new developments with security and airspace issues that were identified within the season.
- **Retardant Review**
This section covers any information about new technology or developments with the retardant industry, reviews the approved products list, and provides updates about the retardant contract and quality assurance program.

Additional Suggested Topics:

In addition to the required elements, the following subjects that can be worked into the workshop if applicable:

- Local Updates, Concerns, Issues
- Geographical Updates, Concerns, Issues
- Individual Agencies or Base Reviews

Flexibility should be encouraged within these topics to meet geographic and audience needs. This refresher shall be designed to provide discussion and information sharing based on the identified topics. The agenda should be revisited annually and be dynamic. Presenters should include, but not limited to Interagency, National, Regional, State and Local instructors involving aviation positions such as SEAT Coordinators, Dispatch, Training, and Unit Aviation Managers.

RT-340, HRSP REFRESHER WORKSHOP

Triennial

16 hrs

Course Description

HRSP Refresher Training should be designed to provide up to date HRSP information to employees holding HRSP qualifications per the 2006 PMS 310-1, Wildland Fire Qualification System Guide. The workshop should contain content and skill building pertinent to agency policies and the duties of the position.

Recommended Resources

[HRSP \(https://www.nifc.gov/hrsp/\)](https://www.nifc.gov/hrsp/) Web site

Course Components and Hours to Complete

Pre-selection assessment	N/A
Pre-course work	N/A
Online training	N/A
Instructor-led training	16
Total Hours	16

Target Group

Personnel holding Incident Command System qualifications requiring HRSP Refresher Training per the 2006 PMS 310-1, Wildland Fire Qualification System Guide.

Minimum Instructor Qualifications

It is recommended that the coordinator be a geographic area HRSP coordinator and that instructors be fully qualified as human resource specialist (HRSP).

Also see NWCG Instructor Certification at the beginning of this Guide.

Course Prerequisites

Qualified as human resource specialist (HRSP).

Course Level

Regional, state or area

RT-372, HELICOPTER MANAGER WORKSHOP

Triennial or as specified by agency

24 hrs

Course Description

This refresher course is intended to update participants on essential helicopter management skills and provide the latest information on helicopter operations. Core elements of the refresher course should cover updates to aviation policy, risk management, and performance planning, along with a pertinent accident review. The desired outcome of this course is to update current helicopter managers on new information while reinforcing existing skills and knowledge.

Objectives

- Review essential duties and responsibilities of the helicopter manager.
- Use risk management techniques to complete assignments safely.
- Update and maintain helicopter management skills.
- Understand changes to aviation policy and how they apply to helicopter management.

Course Components and Hours to Complete

Pre-selection assessment	N/A
Pre-course work	8
Online training	N/A
Instructor-led training	16
Total Hours	24

Target Group

Qualified and trainee helicopter managers.

Minimum Instructor Qualifications

Lead instructor must be a current or previously qualified as helicopter manager.

Unit instructors will be selected for their expertise in field, i.e., aircraft payment documents, aviation maintenance, avionics, contracting, risk management.

Also see NWCG Instructor Certification at the beginning of this Guide.

Course Prerequisites

Qualified or trainee helicopter manager.

Satisfactory completion of pre-course work.

Course Level

Regional, state, or area

Time:

8 hours of the 24 hours can consist of pre-work, generated by the course coordinator, involving online aviation training or practical exercises.

Core elements of a refresher will include the following:

- Aviation Policy updates
- Risk Management
- Accident review, lessons learned
- Performance Planning

Optional Topics:

- Pay documents
- Dispatch and flight following Procedures
- Contracting
- Operations
- Pre-use inspections
- Maintenance
- Communications
- Agency break outs
- Agency briefings
- Project/Logistical/Support Planning
- Hazardous Materials
- Accident Investigation
- Crew Resource Management (CRM)
- Air Space
- Practical exercises testing students' knowledge of Helicopter Operations (to be developed at the discretion of the course cadre).
- Other topics determined by the course cadre to be pertinent to the audience.

Flexibility should be encouraged within these topics to meet geographic and audience needs. This refresher shall be designed to provide discussion and information sharing based on the identified topics. The agenda should be revisited annually and be dynamic. Presenters should include, but not limited to Interagency, National, Regional, State and Local instructors involving aviation positions such as Dispatch, Air Attack, Training, and Unit Aviation Managers.

Course Description

The ATGS refresher is designed to provide the participants with the following:

Current and relevant ATGS/Aerial Supervision program information pertaining to:

- Risk management
- Fire and aviation weather
- Aviation incidents/accidents from the preceding season
- Contract and aircraft fleet updates
- Issues and concerns from national and/or regional user groups (fire management, dispatch, hotshots, incident commanders, etc.)
- Crew Resource Management (CRM)

An opportunity to practice ATGS skills such as:

- Radio programming
- Map reading and navigation
- Crew Resource Management
- Mission procedures
- Fire Traffic Area (FTA) management

In addition to the above course content, All ATGS will demonstrate proficiency by completing a moderate complexity mission or flight/STEX exercise as defined/outlined in the 2013 edition of the *Interagency Aerial Supervision Guide (IASG)*, Appendix C. Performance will be documented on a Mission Evaluation, reviewed with the participant, and forwarded to the Geographic Area Coordination Center (GACC) ATGS Cadre Member. Failure to pass the exercise will require the decertification process to be implemented.

Objectives

- Review duties and responsibilities of the ATGS.
- Review the risk management process to ensure the safety of aviation operations.
- Review changes to aviation policy and how they apply to Aerial Supervision.
- Refresh/practice ATGS skills.
- Demonstrate proficiency by completing a moderate complexity mission or flight/Sand Table Exercise (STEX).

Course Components and Hours to Complete

Pre-selection assessment	N/A
Pre-course work	8
Online training	N/A
Instructor-led training	16
Total Hours	24

Target Group

Qualified and trainee air tactical group supervisors (ATGS).

Minimum Instructor Qualifications

Lead instructor must meet current S-378 instructor requirements.

Unit instructors will be selected for their expertise in field, i.e., aircraft payment documents, aviation maintenance, avionics, contracting, risk management, aviation safety.

Also see NWCG Instructor Certification at the beginning of this Guide.

Course Prerequisites

Qualified or trainee air tactical group supervisor (ATGS).

Course Level

Regional, state, or area

The pre-course work, generated by the course coordinator/lead instructor will consist of online aviation training or practical exercises.

Core elements of a refresher will include the following:

- Risk management/System Safety
- Mission procedures
- CRM
- FTA management
- Evaluated flight simulation/STEX (2013 IASG Appendix C)
- Fire and aviation weather
- Lessons learned/case studies

Optional Topics:

- Radio programming
- Map reading/navigation
- Fleet updates
- Contract updates
- Payment documents
- Aerial firefighting strategy and tactics
- Electronic flight bags

Flexibility should be encouraged within these topics to meet geographic and audience needs. This refresher shall be designed to provide discussion and information sharing based on the identified topics. The agenda should be revisited annually to ensure current and relevant material is presented. Presenters should include, but not limited to interagency, national, regional, state and local instructors involving aviation positions such as Dispatch, Lead/ASM pilots/crews.

Course Description

This course is designed to introduce students to the tools and techniques used to perform in the role of a prescribed fire burn boss. The course material is based on the tasks found in the position task book for prescribed fire burn boss. It leads the student through the duties and responsibilities associated with the position of the prescribed fire burn boss including evaluation and implementation of a prescribed fire plan.

Objective

- Provide students with the information needed to successfully review a prescribed fire burn plan for technical accuracy and implement a prescribed burn.

Course Components and Hours to Complete

Pre-selection assessment	2
Pre-course work	N/A
Online training	N/A
Instructor-led training	24
Total Hours	26

Target Group

Personnel desiring to be qualified as prescribed fire burn boss type 2 (RXB2).

Minimum Instructor Qualifications

Lead and unit instructors must be qualified as prescribed fire burn boss type 2 (RXB2).

Also see NWCG Instructor Certification at the beginning of this Guide.

Course Prerequisites

Qualified as a firing boss (FIRB) and incident commander type 4 (ICT4).

Introduction to Fire Behavior Calculations (S-390).

Proficient in the use of BehavePlus.

Satisfactory completion of pre-selection assessment.

Students desiring to take both RX-341 (Prescribed Fire Plan Preparation) and RX-301 will benefit from taking RX-341 first.

Course Level

Regional, state, or area

Course Description

This course is designed to provide students with the knowledge and skills necessary to recognize and communicate the relationships between basic fire regimes and first order fire effects, the effects of fire treatments on first order fire effects, and to manipulate fire treatments to achieve desired first order fire effects.

In an effort to maintain the currency and relevancy of the course materials for Introduction to Fire Effects, RX-310 the instructional design has been modified to allow instructors to develop materials based on current information, changing technologies, and the needs of the students.

There are no official pre-course materials for the course. Pre-course work can be created and distributed at the discretion of the cadre. The purpose of any pre-course work used for the course should be to ensure students have an adequate skill level or access to information to be successful in the instructor led portion of the training or to gather information about students such as previous experience with the subject matter.

This course is currently not available for order through PMS; for additional information please email NWCG Training at BLM_FA_NWCG_Training@blm.gov.

Objectives

- Students will demonstrate an understanding of fire as an ecological process using the concepts of fire regimes and first order fire effects at multiple scales.
- Given an altered fire regime and a variety of socio-political issues and resource concerns, the student will be able to identify realistic management solutions in an adaptive management framework.
- Students will be able to communicate effectively with fire and resource professionals based on a common understanding of first order fire effects.
- Students will be able to demonstrate an understanding of how fire management related resource issues interact.
- Discuss how to manipulate fire treatments to achieve desired first order fire effects.

Course Components and Hours to Complete

Pre-selection assessment	N/A
Pre-course work	TBD
Online training	N/A
Instructor-led training	30-36
Total Hours	30-36

Target Group

Fire and resource specialists involved in fire related decision making. Interdisciplinary team resource advisors or prescribed fire crew member working toward burn boss, or other prescribed fire positions.

Minimum Instructor Qualifications

All instructors should have familiarity working with fire management programs and a thorough understanding of fire effects as it applies to their specialty.

Also see NWCG Instructor Certification at the beginning of this Guide.

Course Prerequisites

Working knowledge of fire behavior and understanding of basic ecological principles.

Satisfactory completion of pre-course work.

Course Level

Regional, state, or area

RX-341, PRESCRIBED FIRE PLAN PREPARATION

2009

34 hrs

Course Description

The purpose of RX-341, Prescribed Fire Plan Preparation, is to provide students with the skills/knowledge to prepare a prescribed fire plan for technical review and approval in accordance with the Interagency Prescribed Fire Planning and Implementation Procedures Reference Guide.

Objectives

- Describe prescribed fire planning policies and guidelines.
- Identify and describe the processes involved in preparing a prescribed fire plan.
- Develop and defend a prescribed fire plan that safely meets management objectives.

Course Components and Hours to Complete

Pre-selection assessment	2
Pre-course work	N/A
Online training	N/A
Instructor-led training	32
Total Hours	34

Target Group

Personnel involved in or plan to be involved in the preparation of prescribed fire plans.

Other positions that would benefit from this course are firing boss (FIRB), fire effects monitor (FEMO), air regulators, fire ecologists, private landowners (e.g. TNC), other state and private agencies, prescribed fire consultants, and fire planners.

Minimum Instructor Qualifications

All instructors must have prescribed fire plan writing and technical review experience.

Lead instructor must be qualified as prescribed fire burn boss type 2 (RXB2).

Also see NWCG Instructor Certification at the beginning of this Guide.

Course Prerequisites

Successful completion of Introduction to Wildland Fire Behavior Calculations (S-390).

Proficient in the use of BehavePlus.

Satisfactory completion of pre-selection assessment.

In addition to the above:

Fire personnel must be qualified as incident commander type 4 (ICT4).

Resource personnel must have knowledge of fire suppression principles and techniques.

Students desiring to take both RX-341 and RX-301 (Prescribed Fire Implementation) will benefit from taking RX-341 first.

Course Level

Regional, state, or area

RX-410, SMOKE MANAGEMENT TECHNIQUES

2003

34 hrs

Course Description

This course leads students through the ecological and historical role of fire, characteristics of smoke and the health, safety and visibility impacts of smoke. Other topics include public relations, legal requirements, meteorology, fuel consumption, smoke production dispersion modeling, and operational smoke management strategies. This course is designed to be interactive in nature. It contains a panel discussion, several exercises designed to facilitate group and class participation and case studies from a variety of fuel types and political challenges. The pre-course work assignment is designed to familiarize students with the Smoke Management Guide and air quality regulations that impact prescribed fire programs.

Objectives

The overall objective of this course is to provide land managers with the knowledge to manage smoke and reduce its impacts on public health and welfare. Given existing and potential air quality regulations, political and social sensitivities, students will be able to:

- Predict, manage, and monitor prescribed fire smoke.
- Describe the legal, professional, and ethical reasons for managing smoke.
- Describe the roles of federal, state, and local agencies and organizations involved with and affected by smoke from prescribed fire.

Course Components and Hours to Complete

Pre-selection assessment	N/A
Pre-course work	2
Online training	N/A
Instructor-led training	32
Total Hours	34

Target Group

Prescribed fire burn boss type 1 (RXB1) and the long term fire analyst (LTAN).

Other positions that would benefit from RX-410 include fire effects monitor, air regulators, fire ecologists, private landowners (e.g., TNC, Plum Creek, consortia), other state and private agencies, prescribed fire consultants, fire planners.

Minimum Instructor Qualifications

Instructors must have prescribed and wildland fire experience as it relates to smoke management planning and implementation.

Also see NWCG Instructor Certification at the beginning of this Guide.

This course is quite demanding from an instructional perspective. Positive course dynamics depend greatly on the technical knowledge, skill and enthusiasm of the instructor. When hosting this course, it is highly recommended that a mentoring program be established for new or potential instructors to shadow experienced instructors.

The shadow will have the opportunity to really focus on the specific material and interact one-on-one with the instructor to acquire a full understanding of the subject before teaching it. This effort will help maintain the quality and consistency of the course and benefit new instructors as well. The intent is simply to build a pool of quality instructors and maintain the integrity of the course.

Course Prerequisites

Students should have a background in prescribed fire planning, implementing, monitoring, permitting or smoke/air regulating.

Satisfactory completion of pre-course work.

Course Level

Regional, state or area

Course Description

RX-510 Advanced Fire Effects is a science-based course designed to support the integration of fire effects knowledge into land management programs. The course emphasizes the importance of considering fire effects in the design, implementation and monitoring of planned fire treatments over multiple spatial and temporal scales. In addition, many of the principles covered can be used to integrate fire effects in support of the wildfire decision-making process. This course recognizes that planning and implementing the use of fire in any capacity are independent activities, and provides opportunities for the burn boss and planner to work together.

The course is an intensive session that provides college-level lectures, case studies, discussion groups, and testing procedures throughout the week. Instructors include agency and university scientists, agency resource specialists, and fire practitioners. Students have many opportunities to interact with the faculty.

To successfully complete RX-510, students are required to complete the pre-course work and attend all sessions for the entire week.

RX-510 is a national level training course. Students should expect long days.

Class size is limited to 84 students.

Objectives

RX-510 will demonstrate the application of science-based fire effects knowledge in planning, implementing, evaluating and communicating the use of wildland fire to meet ecologically based land management objectives.

- Translate broad ecological information into goals and objectives for the management of wildland fire to meet resource objectives.
- Incorporate short-term and long-term fire effects information into planning and implementation for the management of wildland fire to meet resource objectives.
- Provide examples and discuss methods for monitoring and evaluating fire effects.
- Apply the adaptive management process to refine a program for the management of wildland fire to meet resource objectives.

Course Components and Hours to Complete

Pre-selection assessment	N/A
Pre-course work	8-12
Online training	N/A
Instructor-led training	40
Total Hours	48-52

Target Group

This course supports the knowledge and skills needed for prescribed fire burn boss, other single resource bosses, prescribed fire manager, and strategic operational planner and other positions that plan and implement complex decisions at multiple scales in fire management.

RX-510 curriculum is primarily developed for wildfire operations personnel and fire practitioners.

Minimum Instructor Qualifications

This course is managed by a National Steering Committee. Nationally recognized subject matter experts and practitioners serve as instructors in this course.

Course Prerequisites

Successful completion of Introduction to Fire Effect (RX-310) and Introduction to Wildland Fire Behavior Calculations (S-390).

Successful completion of pre-course reading and development of a brief project for presentation in the peer learning groups.

Course Level

National

For additional course information refer to the NAFRI Web site at <https://www.nafri.gov>.

S-110, BASIC WILDLAND FIRE ORIENTATION

2014

15 min

Course Description

Basic Wildland Fire Suppression Orientation is a video which provides essential information for personnel interested in wildland fire management. It may be used as a companion to S-130, Firefighter Training, and is particularly useful for indoctrination of non-fire management employees to the world of wildland fire. The video provides information on personal preparedness and responsibility, mobilization, incident procedures, proper clothing and equipment, and living conditions in wildland fire camps.

Objective

At the successful completion of this course, students will be able to:

- Provide new personnel and non-fire management employees with introductory information about wildland fire management.

Course Components and Hours to Complete

Pre-selection assessment	N/A
Pre-course work	N/A
Online training	15 minutes
Instructor-led training	N/A
Total Hours	15 minutes

Target Group

Personnel without previous wildland fire position experience.

Minimum Instructor Requirements

None

Course Prerequisites

None

Course Level

Local

Course Access and Additional Course Information

Can be found at <https://www.nwcg.gov/> under the Training and Qualifications dropdown.

S-130, FIREFIGHTER TRAINING

2003

30-35½ hrs

Course Description

This course is designed to provide entry level firefighters skills. Field time is encouraged, and many of the units are set up so they can be taught in either the classroom or the field. The field exercise for Unit 12 is required. A version of L-180, Human Factors on the Fireline, has been included as part of this course. Credit should be issued for both S-130 and L-180 upon completion of this course.

Objectives

- Explain what the LCES (Lookouts, Communications, Escape Routes, and Safety Zones) system is and how it relates to the Standard Firefighting Orders.
- Construct fireline to required standards using various methods.
- Strengthen, reinforce, and use holding actions on a fireline.
- Extinguish the fire with or without the use of water.
- Complete assigned tasks in a safe and efficient manner.
- Given an assignment in a wildfire environment, describe factors in that environment which could impact safety.

Course Components and Hours to Complete

Pre-selection assessment	N/A
Pre-course work	N/A
Online training	N/A
Instructor-led training	30-35.5
Total Hours	30-35.5

Target Group

Entry-level firefighters.

Minimum Instructor Qualifications

Lead instructor must be a qualified single resource boss.

Unit instructors must be qualified as firefighters type 1 (FFT1).

Also see NWCG Instructor Certification at the beginning of this Guide.

Course Prerequisites

Successful completion of Introduction to Wildland Fire Behavior (S-190).

Course Level

Local

The "Clues and DECIDE wallet card", NFES 2148 and "Do's and Don'ts of HazMat card", NFES 2149 referenced in the Instructor Guide are no longer available through the Publications Management System. Please delete this section of the training course.

Course Description

This course was developed using a **blended approach** to learning, meaning that it contains a mix of online and instructor-led training (ILT). The course addresses the foundational skills universal to all wildland firefighters. The material is divided into 12 online modules (1 to 3 hours each) and a mandatory, instructor-led field exercise. Each online module explains the concepts and skills that will be performed and evaluated on the field exercise. Module 12 contains optional knowledge areas (pump operations, map and compass, fire investigation and cultural resources) that are very useful concepts, but not required due to time constraints.

To succeed on the field exercise, students must understand the concepts taught in modules 1 through 11 as documented by module certificates of completion. Both students and instructors can find an overview of the field exercise in module 13. This module informs instructors how to set up the exercise, lists materials needed, and provides evaluation checklists. It also provides students an idea of what to expect and what they will be evaluated on.

There is a challenge review at the end of each module. If you successfully complete the challenge review, you will be able to print a module certificate of completion. **Before you begin the challenge review, you MUST be connected to an active printer!**

Objectives

- Explain what the LCES (Lookouts, Communications, Escape Routes, and Safety Zones) system is and how it relates to the Standard Firefighting Orders.
- Construct fireline to required standards using various methods.
- Strengthen, reinforce, and use holding actions on a fireline.
- Extinguish the fire with or without the use of water.
- Complete assigned tasks in a safe and efficient manner.
- Given an assignment in a wildfire environment, describe factors in that environment which could impact safety.

Course Components and Hours to Complete

Pre-selection assessment	N/A
Pre-course work	N/A
Online training	22
Field Exercise	8-10
Total Hours	30-32

Target Group

Entry-level firefighters

Minimum Instructor Requirements

Module 13, Field Exercise – Lead instructor must be a qualified single resource boss; additional instructors must be qualified as firefighter type 1 (FFT1).

Also see NWCG Instructor Certification at the beginning of this Guide.

Course Prerequisites

Successful completion of Introduction to Wildland Fire Behavior (S-190).

Course Level

Local

Course Access and Additional Course Information

S-131, FIREFIGHTER TYPE 1

2016

12 hrs

Course Description

Firefighter Type 1, S-131, is a twelve-hour course designed to meet the training needs of the Firefighter Type 1 (FFT1) and/or Incident Commander Type 5 (ICT5). This course is designed to be interactive in nature. It contains class discussion and several tactical decision games designed to facilitate learning the objectives. Topics include operational leadership, communications, LCES and tactical decision making.

Objectives

- Identify position responsibilities and demonstrate the ability to apply principles of Operational Leadership found in the Incident Response Pocket Guide (IRPG; PMS 461)
- Describe how to incorporate and maintain open lines of communication with appropriate personnel, and identify documentation responsibilities.
- Identify Look Up, Down and Around indicators and demonstrate the ability to apply the components of Lookouts, Communications, Escape Routes, and Safety Zones (LCES) as described in the IRPG.
- Demonstrate the ability to apply tactical decision making procedures.

Course Components and Hours to Complete

Pre-selection assessment	N/A
Pre-course work	N/A
Online training	N/A
Instructor-led training	12
Total Hours	12

Target Group

Personnel desiring to be qualified as firefighter type 1 (FFT1) and/or incident commander type 5 (ICT5).

Minimum Instructor Qualifications

Lead instructors must be qualified single resource boss.

Unit instructors must be qualified as firefighter type 1 (FFT1).

Also see NWCG Instructor Certification at the beginning of this Guide.

Course Prerequisites

Qualified as a firefighter type 2 (FFT2).

Course Level

S-190, INTRODUCTION TO WILDLAND FIRE BEHAVIOR

2006

6-8 hrs

Course Description

This course provides instruction in the primary factors affecting the start and spread of wildfire and recognition of potentially hazardous situations. S-190 is typically taught in conjunction with or prior to Basic Firefighter Training, S-130. It is designed to meet the fire behavior training needs of a firefighter type 2 (FFT2) on an incident as outlined in the PMS 310-1, Wildland Fire Qualification System Guide and the position task book developed for the position.

Objectives

- Identify and discuss the three sides of the fire triangle.
- Identify the environmental factors of fuels, weather and topography that affect the start and spread of wildland fire.
- Describe the contributing factors that indicate the potential for increased fire behavior that may compromise safety.

Course Components and Hours to Complete

Pre-selection assessment	N/A
Pre-course work	N/A
Online training	N/A
Instructor-led training	6-8
Total Hours	6-8

Target Group

Entry-level firefighters.

Minimum Instructor Qualifications

Lead instructor must be a qualified single resource boss.

Unit instructors must be qualified as firefighter type 1 (FFT1).

Also see NWCG Instructor Certification at the beginning of this Guide.

Course Access and Additional Course Information

Can be found at <https://www.nwcg.gov/> under the Training and Qualifications dropdown.

Course Description

This course is designed to meet the training needs of the incident commander type 4 (ICT4). It is presented in a discussion/exercise format. The six instructional units include Foundation Skills; Intelligence Gathering and Documentation; Size Up the Incident; Develop a Plan of Action; Post-fire Activities; Evaluating Incident Objectives and Manage the Incident. Evaluation of the student is by unit tests and performance based evaluations.

Objectives

- Demonstrate effective foundation skills (leadership, risk management, and communications) at the ICT4 level.
- Gather and document essential information about the incident.
- Size up the incident, develop plan of action.
- Manage the incident through effective leadership.
- Demonstrate the ability to evaluate plan of action and make adjustments to the plan when necessary.
- Conduct post-fire activities.

Course Components and Hours to Complete

Pre-selection assessment	N/A
Pre-course work	3
Online training	N/A
Instructor-led training	16
Total Hours	19

Target Group

Personnel desiring to be qualified as incident commander type 4 (ICT4).

Minimum Instructor Qualifications

Lead instructor must be a qualified incident commander type 3 (ICT3) or prescribed fire burn boss type 2 (RXB2).

Unit instructors must be qualified as incident commanders type 4 (ICT4).

Cadre must be proficient in the delivery of Tactical Decision Games (TDGS).

Also see NWCG Instructor Certification at the beginning of this Guide.

Course Prerequisites

Qualified as any single resource boss.

Satisfactory completion of pre-course work.

Course Level

Local

Course Description

The purpose of this course is to provide students with the skills and knowledge needed to serve as public information officers (PIOF). The course covers establishing and maintaining an incident information operation, communicating with internal and external audiences, working with the news media, handling special situations, and long term planning and strategy.

Objective

- Students will demonstrate the skills and knowledge of a public information officer (PIOF) by successfully participating in a simulation and passing a written exam.

Course Components and Hours to Complete

Pre-selection assessment	N/A
Pre-course work	3
Online training	N/A
Instructor-led training	30
Total Hours	33

Target Group

Personnel desiring to be qualified as public information officer (PIOF).

Minimum Instructor Qualifications

Lead instructor must be a qualified Type 2 public information officer (PIO2).

Unit instructors must be qualified as public information officer (PIOF).

Also see NWCG Instructor Certification at the beginning of this Guide.

Course Prerequisites

Satisfactory completion of pre-course work.

Course Level

Local

Course Description

This course is designed to provide knowledge and skills to design, setup, operate, troubleshoot, and shut down portable water delivery systems. The focus is on portable pumps – it does not address water delivery for engines. Topics covered include: portable water delivery systems; equipment; roles and responsibilities; and system design and hydraulics. There is also a field exercise where students will apply what they learned in the classroom.

Objective

- Demonstrate knowledge and skills to design, set up, operate, troubleshoot, and shut down portable water delivery systems.

Course Components and Hours to Complete

Pre-selection assessment	N/A
Pre-course work	N/A
Online training	N/A
Instructor-led training	16-20
Total Hours	16-20

Target Group

Personnel desiring to be qualified as firefighter type 1 (FFT1) or incident commander type 5 (ICT5), or those wanting to learn more about portable pumps and water use.

Minimum Instructor Qualifications

Instructors must be knowledgeable in the use and maintenance of portable water pumps. Hydraulics unit requires competency in that subject matter.

Also see NWCG Instructor Certification at the beginning of this Guide.

Course Prerequisites

None

Course Level

Local

Course Description

This is an instructor-led course intended to be presented at the local level. The course lessons provide introduction to the function, maintenance and use of internal combustion engine powered chain saws, and their tactical wildland fire application. Field exercises support entry level training for firefighters with little or no previous experience in operating a chain saw, providing hands-on cutting experience in surroundings similar to fireline situations.

Objectives

- Define and apply chain saw safety standards as required by OSHA and agency handbooks, manuals, directives, and owner's manuals.
- Identify and demonstrate basic chain saw operation, troubleshooting, maintenance, and safety features.
- Demonstrate the tactical application of chain saws in fireline construction and mop up operations.

Course Components and Hours to Complete

Pre-selection assessment	N/A
Pre-course work	1
Online training	N/A
Instructor-led training	24-36
Total Hours	25-37

Target Group

Individuals desiring to be qualified as Basic Faller (FAL3), Firefighter Type 1 (FFT1), Incident Commander Type 5 (ICT5), or Felling Boss, Single Resource (FELB).

Minimum Instructor Qualifications

Instructor qualifications are agency determined.

Also see NWCG Instructor Certification at the beginning of this Guide.

Course Prerequisites

Qualified as a firefighter type 2 (FFT2).

Satisfactory completion of pre-course work.

Course Level

Local

Course Description

This is an instructor-led course intended to be presented at the local level. Instructional units include firefighter safety in the interface, managing human factors in the interface, pre-incident planning, sizeup and initial strategy, structure triage, structure protection overview, tactics in the interface, tactical operations and resource use in the interface, action assessment, plan update, and after action review.

Objective

At the successful completion of this course, students will be able to:

- Operate safely and effectively in a wildland/urban interface incident by using situation awareness, performing structure triage, using pre-planning tools, having a basic understanding of fire behavior, and using strategy and tactics unique to the wildland/urban interface environment.

Course Components and Hours to Complete

Pre-selection assessment	N/A
Pre-course work	N/A
Online training	N/A
Instructor-led training	16-24
Total Hours	16-24

Target Group

Designed to assist any emergency responders who will be planning for and making operational decisions during an interface incident. This course is for personnel desiring to be qualified as incident commander type 4 (ICT4), task force leader (TFLD), or any strike team leader.

Minimum Instructor Qualifications

Lead instructor must be a qualified incident commander type 3 (ICT3), task force leader (TFLD), or division group supervisor (DIVS).

Unit instructors must be qualified as incident commander type 4 (ICT4) or any strike team leader.

Cadre should include representatives from both structure and wildland fire disciplines.

Also see NWCG Instructor Certification at the beginning of this Guide.

Course Prerequisite

Qualified as a firefighter type 1 (FFT1).

Course Level

Local

Course Description

This course was developed using a **blended approach** to learning, meaning that it contains a mix of online and instructor-led training (ILT). Students are required to complete the online training portion of the course prior to taking the ILT. The course introduces the roles and responsibilities of a firing boss (FIRB) and outlines duties of other personnel who may engage firing operations. The course discusses and illustrates common firing devices and techniques. Although comprehensive in nature, the course work is not a substitute for the dynamic fire environment. The course provides students with important information regarding general tasks required to be successful. Any opportunity to show students a real ignition or demonstrate the use of an actual firing device will assist in transferring these new concepts and skills to the job. There is an optional field day outlined in the course, it is the discretion of the delivery unit to include the field day, however, if logistically feasible it is suggested by NWCG that a field day be conducted.

Objectives

- Identify the roles and responsibilities of the FIRB for planning, execution, safety, coordination, and evaluation of an ignition operation on a wildland or prescribed fire.
- Describe the characteristics, applications, safety and availability of the various firing devices a FIRB has at their disposal.
- Given a wildland or prescribed scenario, prepare a firing plan and briefing that contains desired fire behavior, firing techniques, required resources, coordination, safety and risk management factors, and communication, to meet specific objectives.

Course Components and Hours to Complete

Pre-selection assessment	N/A
Pre-course work	N/A
Online training	2
Instructor-led training	16-18
Field day (optional)	4
Total Hours	18-24

Target Group

Personnel desiring to be qualified as firing boss, single resource (FIRB) and firefighter type 1 and 2 personnel looking to gain valuable information to conduct or participate in firing operations.

Minimum Instructor Qualifications

Lead instructor must be a qualified firing boss, single resource (FIRB).

Unit instructors must be qualified as any single resource boss.

Also see NWCG Instructor Certification at the beginning of this guide.

Course Prerequisites

Qualified as a firefighter type 2 (FFT2).

Course Level

Local

Course Description

This is a classroom course designed to produce student proficiency in the performance of duties associated with the single resource boss position from initial dispatch through demobilization to the home unit. Topics include operational leadership, preparation and mobilization, assignment preparation, risk management, entrapment avoidance, safety and tactics, offline duties, demobilization, and post incident responsibilities.

Objectives

- Describe crew boss responsibilities prior to and during mobilization, on the incident, and during demobilization.
- Identify the hazards and risks on various incidents and describe how to mitigate them.
- Describe tactics which are appropriate to various wildland fire situations and procedures to implement them through the chain of command.

Course Components and Hours to Complete

Pre-selection assessment	N/A
Pre-course work	2
Online training	N/A
Instructor-led training	24
Total Hours	26

Target Group

Personnel desiring to be qualified as any single resource boss.

Minimum Instructor Qualifications

Lead instructor must be a qualified strike team leader (STL) or task force leader (TFLD).

Unit instructors must be qualified as any single resource boss.

Also see NWCG Instructor Certification at the beginning of this Guide.

Course Prerequisites

Qualified as firefighter type 1 (FFT1).

Successful completion of Intermediate Wildland Fire Behavior (S-290).

Satisfactory completion of pre-course work.

Course Level

Local

S-230 Unit 4C Exercise Maps (NFES 2793) (<https://www.nwcg.gov/?q=publications/training-courses/s-230-crew-boss-topographic-maps>) are available for downloading onto a plotter as well as for purchase through the Publications Management System.

Course Description

This course was developed using a **blended approach** to learning, meaning that it contains a mix of online and instructor-led training (ILT). Students are required to complete the online training portion of the course and pass an online assessment prior to taking the ILT. The focus of the online training is to teach knowledge and concepts. The ILT will reinforce the content learned online and provide opportunities to apply this knowledge to real-world scenarios and practical exercises. Upon completion of the ILT, students must then take and pass a final assessment in order to receive credit for the course. The final assessment covers content from both the online and ILT portions of the course.

Note: Instructors must order specific course materials for the classroom/instructor led portion of the blended course. Reference the *NFES Catalog Part 2: Publications* for ordering information.

- 1) NFES 002974 S-230 Instructor Guide
- 2) NFES 002975 S-230 Student Workbook
- 3) NFES 002976 S-230 CD-ROM Course Materials

Objectives

- Describe Crew Boss responsibilities prior to and during mobilization on the incident, and during demobilization.
- Identify the hazards and risks on various incidents and describe how to mitigate them.
- Describe tactics that are appropriate to various wildland fire situations and implement them through the chain of command.

S-231, ENGINE BOSS (SINGLE RESOURCE)

2004

12-16 hrs

Course Description

This is a skill course designed to produce student proficiency in the performance of the duties associated with engine boss, single resource (ENGB). Topics include engine and crew capabilities and limitations, information sources, fire sizeup considerations, tactics, and wildland/urban interface.

Note: Instructors must order specific course materials for the classroom/instructor led portion of the blended course. Reference the *NFES Catalog Part 2: Publications* for ordering information.

- 1) NFES 002971 S-231 Instructor Guide
- 2) NFES 002972 S-231 Student Workbook
- 3) NFES 002973 S-231 CD-ROM Course Materials

Objective

- Perform the tasks of an engine boss in making the tactical decisions required to safely manage an engine on an incident.

Course Components and Hours to Complete

Pre-selection assessment	N/A
Pre-course work	N/A
Online training	N/A

Local

***This course references the Wildland Fire Tactics Guide, PMS 465. This publication was removed from PMS in March 2006 and is no longer available. If using the Sample Selection Letter in the Course Instructions section, please delete pre-course work requirements for this course.**

Course Description

This course was developed using a blended approach to learning, meaning that it contains a mix of online and instructor-led training (ILT). Students are required to complete the online training portion of the course and pass an online assessment prior to taking the ILT. The focus of this online training is to teach knowledge and concepts. The ILT will reinforce the content learned online and provide opportunities to apply this knowledge to real-world scenarios and practical exercises. Upon completion of the ILT, students must then take and pass a final assessment in order to receive credit for the course. The final assessment covers content from both the online and ILT portions of the course.

Note: Instructors must order specific course materials for the classroom/instructor led portion of the **blended** course. Reference the *NFES Catalog Part 2: Publications* for ordering information.

- 1) NFES 002971 S-231 Instructor Guide
- 2) NFES 002972 S-231 Student Workbook
- 3) NFES 002973 S-231 CD-ROM Course Materials

Objective

- Perform the tasks of an Engine Boss in making the tactical decisions required to safely manage an engine and personnel on an incident.

Course Components and Hours to Complete

Pre-selection assessment	N/A
Pre-course work	N/A
Online training	6
Instructor-led training	6-10
Total Hours	12-16

Target Group

Personnel desiring to become qualified as engine boss, single resource (ENGB).

Minimum Instructor Qualifications

Lead instructor must be a qualified strike team leader engine (STEN) or task force leader (TFLD).

Unit instructors must be qualified as engine boss, single resource (ENGB).

Also see NWCG Instructor Certification at the beginning of this Guide.

Course Prerequisites

Successful completion of Crew Boss, Single Resource (S-230) (instructor led or blended delivery).

Course Level

Local

Course Access and Additional Course Information

Can be found at <https://www.nwcg.gov/> under the Training and Qualifications dropdown.

Course Description

This is a skill course is designed to meet the training needs of a Heavy Equipment Boss on an incident as outlined the PMS 310-1 and the Position Task Book developed for the position. Primary considerations are tactical use and safety precautions required to establish and maintain an effective dozer operation. A field exercise is required as part of the course.

Objectives

At the successful completion of this course, students will be able to:

- Identify the administrative duties and procedures required of a HEQB.
- Identify and demonstrate the heavy equipment inspection process and related duties of the HEQB.
- Demonstrate the actions required of a heavy equipment boss to safely and effectively complete an assignment.
- Discuss relevant information and methods for communication and tactics related to heavy equipment.
- Identify the process of preparing for an all hazard assignment.

Course Components and Hours to Complete

Pre-selection assessment	N/A
Pre-course work	2
Online training	N/A
Instructor-led training	18-22
Total Hours	20-24

Target Group

Personnel desiring to be qualified as heavy equipment boss, single resource (HEQB).

Minimum Instructor Qualifications

Lead instructor must be a qualified strike team leader, heavy equipment (STEQ) or task force leader (TFLD).

Unit instructors must be qualified single resource boss, heavy equipment (HEQB).

Also see NWCG Instructor Certification at the beginning of this Guide.

Course Prerequisites

Qualified as firefighter type 1 (FFT1).

Satisfactory completion of pre-course work.

Course Level

Local

Course Description

This course provides students with the skills necessary to perform as a field observer (FOBS) and/or a fire effects monitor (FEMO). Topics include roles and responsibilities of the FOBS and FEMO; how to make observations and document those observations; how to produce hand drawn and GPS field maps; and how to navigate using a compass and GPS. The navigation unit has 4½ hours of field exercises and the final field exercise is 8 hours. For pre-course work, students need to read and complete exercises in *Basic Land Navigation* (NFES 2865).

Objective

- Demonstrate skills and knowledge to gather and report information for incident planning.

Course Components and Hours to Complete

Pre-selection assessment	N/A
Pre-course work	8
Online training	N/A
Instructor-led training	20
Total Hours	28

Target Group

Personnel desiring to be qualified as field observer (FOBS) and/or fire effects monitor (FEMO).

Minimum Instructor Qualifications

Lead instructor must be a qualified situation unit leader (SITL).

Unit instructors must be qualified as either field observer (FOBS) or fire effects monitor (FEMO).

Also see NWCG Instructor Certification at the beginning of this Guide.

Course Prerequisites

Successful completion of Intermediate Wildland Fire Behavior (S-290).

Successful completion of pre-course work.

Basic understanding of how to use a GPS receiver.

FOBS: Qualified as any single resource boss.

OR

FEMO: Qualified as a firefighter type 2 (FFT2).

Course Level

Local

S-245, DISPLAY PROCESSOR

2007

10 hrs

Course Description

This course provides students with the skills necessary to perform as a display processor (DPRO). Topics include general roles and responsibilities and how to assist the situation unit leader with producing incident maps, inputs for the Incident Status Summary (ICS-209) and other incident products. The final exam is 3 hours. For pre-course work, students need to read specific chapters in *Basic Land Navigation* (NFES 2865).

Objective

- Collect and evaluate information to produce maps, ICS-209 inputs, and other incident products within established guidelines and timeframes.

Course Components and Hours to Complete

Pre-selection assessment	N/A
Pre-course work	2
Online training	N/A
Instructor-led training	8
Total Hours	10

Target Group

Personnel desiring to be qualified as display processor (DPRO).

Minimum Instructor Qualifications

Lead instructor must be a qualified situation unit leader (SITL).
Unit instructors must be qualified as display processor (DPRO).
Also see NWCG Instructor Certification at the beginning of this Guide.

Course Prerequisites

Satisfactory completion of pre-course work.

Course Level

Local

Course Description

This course is designed to introduce students to the tools and techniques used to perform the duties of a status check-in recorder (SCKN). The course provides an overview of what a student can expect if dispatched to an incident.

Each student will need access to a computer that has the most current incident automation software. At the time of this publication, I-Suite was the industry standard.

Objectives

The desired outcome of this course is to prepare students to:

- Set up and manage a check-in station.
- Process information using incident automation software and other paper based methods.
- Package the information into useful products.
- Assist with demobilization.

Course Components and Hours to Complete

Pre-selection assessment	N/A
Pre-course work	N/A
Online training	N/A
Instructor-led training	16
Total Hours	16

Target Group

Personnel desiring to be qualified as status/check-in recorder (SCKN).

Minimum Instructor Qualifications

Lead instructor must be a qualified resource unit leader (RESL).

Unit instructors must be qualified status/check-in recorders (SCKN).

Also see NWCG Instructor Certification at the beginning of this Guide.

Course Prerequisites

It is recommended that students have completed Basic ICS (ICS-200) and Human Factors (L-180), and have basic computer skills in the Windows environment.

Course Level

Local

Course Description

This course is designed to provide the prerequisite knowledge and skills necessary to perform the tasks of a communications technician (COMT) in the Incident Command System (ICS). Topics include installation, maintenance, and troubleshooting of National Incident Radio Support Cache (NIRSC) communications equipment on incidents. The course consists of classroom instruction, field exercises, a written exam, and a practical final exam.

Objectives

- Identify and describe the responsibilities of the COMT prior to, during mobilization, and demobilization.
- Identify and explain basic communications theory, the capabilities of NIRSC specialty equipment and assist with installation, and hazards and risks on various incidents and how to mitigate them.
- Recognize, plan for, and demonstrate the ability to provide adequate incident communications coverage.
- Demonstrate proper installation of equipment, the ability to properly program NIRSC incident handheld radios, and the ability to accurately troubleshoot and field repair NIRSC equipment.

Course Components and Hours to Complete

Pre-selection assessment	N/A
Pre-course work	N/A
Online training	N/A
Instructor-led training	32
Total Hours	32

Target Group

Personnel desiring to be qualified as communications technician (COMT).

Minimum Instructor Qualifications

Lead instructor must be a qualified communications unit leader (COML).

Unit instructors must be qualified as incident communications technician (COMT).

Also see NWCG Instructor Qualifications at the beginning of this Guide.

Course Prerequisites

It is recommended that students have completed Basic ICS (ICS-200), Basic Fire Suppression Orientation (S-110) and have reviewed the Basic Aviation Safety Guide (NFES 2097).

Course Level

Regional, state, or area

S-260, INTERAGENCY INCIDENT BUSINESS MANAGEMENT (ONLINE)

2014

16 hrs

Course Description

This online course meets the general training needs of all positions for which an understanding of interagency incident business management is required. The Interagency Incident Business Management Handbook, PMS 902, is used as the primary job aid to supplement this course. It provides basic policy and direction for incident business management.

Objectives

Given the Interagency Incident Business Handbook, students will locate and apply the appropriate regulations, established interagency procedures, and necessary forms for each of the following incident management areas:

- Application of conduct and ethics in incident support
- Recruitment, classification, pay provisions and timekeeping/recording, commissary, injury compensation, and travel
- Acquisition
- Managing and tracking government property
- Interagency coordination and cooperation
- Investigating, documenting, and reporting claims
- Containing incident costs
- All risk

Course Components and Hours to Complete

Pre-selection assessment	N/A
Pre-course work	N/A
Online training	16
Instructor-led training	N/A
Total Hours	16

Target Group

All ICS positions and personnel seeking knowledge of incident business management.

Minimum Instructor Requirements

None

Course Prerequisites

None

Course Level

Local

Course Access and Additional Course Information

Can be found at <https://www.nwcg.gov/> under the Training and Qualifications dropdown.

The Accident Investigation Module was removed from the online course in September 2014 to better align the course with the Interagency Incident Business Management Handbook.

Course Description

This is an instructor led course designed for entry-level finance positions. The format is a mix of exercises, facilitated group discussions, and lecture supported by PowerPoint presentations. Students work directly from the Interagency Incident Business Management Handbook for most of the exercises.

S-261 is designed to be taken after completion of S-260, Interagency Incident Business Management.

Objective

At the successful completion of this course, students will describe roles and responsibilities, and demonstrate proficiency in the skills/knowledge required to perform the tasks of the following positions:

- Equipment Time Recorder (EQTR)
- Compensation for Injury Specialist (INJR)
- Claims Specialist (CLMS)
- Personnel Time Recorder (PTRC)

Course Components and Hours to Complete

Pre-selection assessment	N/A
Pre-course work	N/A
Online training	N/A
Instructor-led training	16-20
Total Hours	16-20

Target Group

Personnel desiring to be qualified as one or more of the financial positions: equipment time recorder (EQTR), compensation for injury specialist (INJR), claims specialist (CLMS), or personnel time recorder (PTRC).

Minimum Instructor Qualifications

Lead instructor must be a qualified finance/administration chief type 2 (FSC2), an administrative officer, or an assistant with incident business management experience.

Also see NWCG Instructor Certification at the beginning of this Guide.

Course Prerequisites

None

Course Level

Local

Course Description

This course is designed to introduce students to tools and techniques used to perform the duties of the Incident Contract Project Inspector (ICPI). The course provides an overview of what students can expect if dispatched to an incident. It also provides general information on basic contract administration, types of equipment that will be inspected, and an opportunity to inspect equipment if the optional field day is completed.

Objectives

At the successful completion of this course, students will be able to:

- Demonstrate the ability to interpret contract specifications.
- Demonstrate the ability to perform basic contract administration.
- Perform equipment inspections.

Course Components and Hours to Complete

Pre-selection assessment	N/A
Pre-course work	N/A
Online training	N/A
Instructor-led training	16
Optional field day	4
Total Hours	16-20

Target Group

Personnel desiring to be qualified as incident contract project inspector.

Minimum Instructor Qualifications

Lead instructor must be qualified as contracting officer of Virtual Incident Procurement (VIPR) Incident Blanket Purchase Agreements (IBPAs) or national agreements, Regional Program Lead for Contract Operations or Regional Equipment Specialist with VIPR COR Authorities.

Unit Instructors should be qualified as an incident contract project inspector (ICPI).

Utilize an interagency cadre in geographic areas where applicable.

Also see NWCG Instructor Certification at the beginning of this Guide.

Course Prerequisites

None

Course Level

Local

Course Description

This course covers aircraft types and capabilities, aviation management and safety for flying in and working with agency aircraft, tactical and logistical uses of aircraft, and requirements for helicopter take-off and landing areas. Note: The regulations, procedures and policies addressed in this course are primarily those governing federal agency and ICS operations. State, county, or other political subdivisions using this course will need to consult their agency having jurisdiction with respect to regulations, procedures and policies.

Objective

- Upon completion of this course the student will have obtained the basic understanding of the different functions of Air Operations.

Course Components and Hours to Complete

Pre-selection assessment	N/A
Pre-course work	1
Online training	N/A
Instructor-led training	16
Total Hours	17

Target Group

Personnel desiring to be qualified as single engine air tanker manager (SEMG), single resource boss, helicopter manager (HMGB), aircraft dispatcher (ACDP), and other positions that require basic knowledge of aviation operations.

Minimum Instructor Qualifications

The lead and unit instructors must be knowledgeable in the use of aviation resources in wildland fire suppression, agency aviation policy, and Federal Aviation Regulations. Also see NWCG Instructor Certification at the beginning of this Guide.

Course Prerequisites

Satisfactory completion of pre-course work.

Course Level

Local

S-271, HELICOPTER CREWMEMBER

2010

24-26 hrs

Course Description

This is a combined classroom/field course designed to provide student proficiency in all areas of the tactical and logistical use of helicopters to achieve efficiency and standardization. Topics include aviation safety, aircraft capabilities and limitations, aviation life support equipment, aviation mishap reporting, pre-flight checklist and briefing/debriefing, aviation transportation of hazardous materials, crash survival, helicopter operations, helicopter field exercise. The following Interagency Aviation Training (IAT) A-courses curriculums are intergraded and may be credited upon completion of this course: A-105 Aviation Life Support Equipment (ALSE), A-113 Crash Survival, and A-219 Helicopter Transport of External Cargo.

Objective

- Upon completion of this course, the student will be able to demonstrate proficiency in all identified areas of helicopter use to safely achieve efficiency and standardization.

Course Components and Hours to Complete

Pre-selection assessment	N/A
Pre-course work	N/A
Online training	N/A
Instructor-led training	24-26
Total Hours	24-26

Target Group

Personnel desiring to be qualified as a helicopter crewmember (HECM).

Minimum Instructor Qualifications

Lead instructor must be a qualified helicopter manager, single resource (HMGB).

Unit instructors must be qualified as helicopter crewmember (HECM).

Also see NWCG Instructor Certification at the beginning of this Guide.

Course Prerequisites

Fire personnel: Qualified as a firefighter type 2 (FFT2).

Non-fire personnel: None

Course Level

Local

Course Description

This course was developed using a **blended approach** to learning, meaning that it contains a mix of online and instructor-led training (ILT). This course is designed to meet the training needs of a Single Engine Air Tanker Manager (SEMG) as outlined in the Wildland Fire Qualification System Guide (PMS 310-1) and the position task book developed for the position.

Students are required to complete five online modules and complete an assessment prior to coming to class.

Objectives

- Perform the tasks required of a SEMG to mobilize and transition into an incident aviation environment.
- Prepare for, manage, and oversee all phases of a single engine air tanker operation to support local unit and incident activities.
- Evaluate the capabilities and organizational needs to implement a safe and efficient single engine air tanker operation to meet the requirements of the local unit and/or an Incident Action Plan, or both

Course Components and Hours to Complete

Pre-selection assessment	N/A
Pre-course work	N/A
Online training	4-6
Instructor-led training	24-30
Total Hours	28-36

Target Group

Personnel desiring to be qualified as a single engine air tanker manager (SEMG).

Minimum Instructor Qualifications

Lead and unit instructors must be qualified as single engine air tanker manager (SEMG). Also see NWCG Instructor Certification at the beginning of this Guide.

Course Prerequisites

Successful completion of Basic Air Operations (S-270).

Course Level

Local

Course Access and Additional Course Information

Online Component can be found at <https://www.nwcg.gov/> under the Training and Qualifications dropdown.

Course Description

This is a classroom-based skills course designed to prepare the prospective fireline supervisor to undertake safe and effective fire management operations. It is the second course in a series that collectively serves to develop fire behavior prediction knowledge and skills. Fire environment differences are discussed as necessary; instructor should stress local conditions.

Objectives

- Identify and describe the characteristics of fuels, weather, and topography that influence wildland fire behavior.
- Describe the interaction of fuels, weather, and topography on wildland fire behavior, fireline tactics, and safety.
- Describe the causes of extreme fire behavior conditions (long range spotting, crowning, and fire whirls) that develop due to weather, fuels, and/or topography.
- Interpret, communicate, apply, and document wildland fire behavior and weather information.

Course Components and Hours to Complete

Pre-selection assessment	2
Pre-course work	3
Online training	N/A
Instructor-led training	32
Total Hours	37

Target Group

Personnel desiring to be qualified as any single resource boss or fire effects monitor (FEMO).

Minimum Instructor Qualifications

The lead instructor must be a qualified strike team leader (STL), task force leader (TFLD) or prescribed fire burn boss type 2 (RXB2). Successful completion of Advanced Fire Behavior Calculations (S-490) is recommended.

Unit instructors must be qualified as any single resource boss.

A meteorologist is highly recommended to instruct the weather sections of this class.

Also see NWCG Instructor Certification at the beginning of this Guide.

Course Prerequisites

Successful completion of Introduction to Wildland Fire Behavior (S-190).

Satisfactory completion of pre-selection assessment and pre-course work.

Course Level

Local

Course Description

This course is NWCG certified and is interchangeable with the NWCG approved S-290 instructor lead training course. Completion time may vary depending on level of student knowledge.

S-290 is the second course in a five course sequence developing wildland fire behavior prediction knowledge and skills. It builds upon the basics in S-190, Introduction to Wildland Fire Behavior, but with more detailed information about characteristics and interactions of the wildland fire environment (fuels, weather, and topography) that affect wildland fire behavior for safety purposes.

Objectives

- Identify and describe the characteristics of fuels, weather, and topography that influence wildland fire behavior.
- Describe the interaction of fuels, weather, and topography on wildland fire behavior, fireline tactics, and safety.
- Describe the causes of extreme wildland fire behavior (long-range spotting, crowning, and fire whirls) developing due to fuels, weather, and/or topography.
- Interpret, apply, and document wildland fire behavior and weather information.

The course is broken into thirteen modules that consist of an introduction and twelve unit topics.

Course Components and Hours to Complete

Pre-selection assessment	N/A
Pre-course work	N/A
Online training	15
Instructor-led training	N/A
Total Hours	15

Target Group

Personnel desiring to be qualified as any single resource boss or fire effects monitor (FEMO).

Minimum Instructor Requirements

None

Course Prerequisites

Successful completion of Introduction to Wildland Fire Behavior (S-190).

Course Level

Local

Course Access and Additional Course Information

Can be found at <https://www.nwcg.gov/> under the Training and Qualifications dropdown.

S-300, EXTENDED ATTACK INCIDENT COMMANDER

2008

22-24 hrs

Course Description

This course is designed to meet the training needs of the incident commander type 3 (ICT3). The focus is on the lessons of leadership and command as they relate to the ICT3 position. It is presented in participative lecture format with multiple tactical decision games for students to practice new knowledge. The seven instructional units cover Foundation Skills, Situational Awareness, Command and Control, Managing the Incident, Transitional Activities, Post-Fire Activities and a Final Simulation. There is also an optional Staff Ride Activity (Unit 8) if instructors choose to include it.

Objectives

- Demonstrate an understanding of the concept of Command as it relates to the ICT3.
- Demonstrate effective foundation skills (leadership, risk management, and communications at the ICT3 level.
- Develop situational awareness of incident environment.
- Demonstrate effective command and control over a quickly assembled team in a time constrained and rapidly changing incident environment.
- Demonstrate the ability to manage an incident.
- Conduct post fire activities.

Course Components and Hours to Complete

Pre-selection assessment	N/A
Pre-course work	6-8
Online training	N/A
Instructor-led training	16
Total Hours	22-24

Target Group

Personnel desiring to be qualified as incident commander type 3 (ICT3).

Minimum Instructor Qualifications

Lead and Unit instructors must be qualified incident commander type 3 (ICT3) or division group supervisors (DIVS).

Also see NWCG Instructor Certification at the beginning of this Guide.

Course Prerequisites

Qualified as incident commander type 4 (ICT4) and task force leader (TFLD).

OR

Qualified as ICT4 and strike team leader and any two single resource boss positions – one must be crew (CRWB) or engine (ENGB).

Satisfactory completion of pre-course work.

Course Level

Regional, state or area

Course Description

This course is designed to meet the training requirements outlined in the PMS 310-1, Wildland Fire Qualification System Guide and the position task books developed for the positions of task force leader and strike team leader. Most examples and exercises in this package are specific to wildland fire suppression, although some all-hazards exercises are included.

Objectives

- Demonstrate the ability to apply the Risk Management Process found in the Incident Response Pocket Guide (IRPG) to various incidents.
- Identify and describe the responsibilities of a Task Force/Strike Team Leader (TFLD/STL).
- Demonstrate the ability to apply appropriate tactics with assigned resources organized into strike teams or task forces.

Course Components and Hours to Complete

Pre-selection assessment	1
Pre-course work	1
Online training	N/A
Instructor-led training	19-20.5
Total Hours	21-22.5

Target Group

Personnel desiring to be qualified as task force leader (TFLD) or any strike team leader.

Minimum Instructor Qualifications

Lead instructor must be a qualified division/group supervisor (DIVS).

Unit instructors must be qualified as strike team leader (STL) or task force leader (TFLD).

Also see NWCG Instructor Certification at the beginning of this Guide.

Course Prerequisites

Qualified as any single resource boss.

Satisfactory completion of pre-selection assessment and pre-course work.

Course Level

Regional, state, or area

Course Description

This course prepares students to perform in the role of division/group supervisor. It provides instruction in support of the specific tasks of the division/group supervisor, but will not instruct students in general management/supervision or in the incident command system (ICS), both of which the student should learn through prerequisite work. Topics include division/group management, organizational interaction, division operations, all-hazard operations, and tactical decision games (optional). There is a final examination in this course.

Objective

- At the successful completion of this course, the student will demonstrate an understanding of the duties required of a division/group supervisor in preparation for completing position task book elements.

Course Components and Hours to Complete

Pre-selection assessment	N/A
Pre-course work	3
Online training	N/A
Instructor-led training	18-20
Total Hours	21-23

Target Group

Personnel desiring to be qualified as a division/group supervisor (DIVS).

Minimum Instructor Qualifications

Lead instructor must be a qualified operations section chief type 2 (OSC2).

Unit instructors must be qualified as division/group supervisor (DIVS) or incident commander type 3 (ICT3).

Also see NWCG Instructor Certification at the beginning of this Guide.

Course Prerequisites

Qualified as task force leader (TFLD) OR Qualified as incident commander type 3 (ICT3) OR Qualified as incident commander type 4 (ICT4) and any two strike team leader positions (one must be STCR or STEN).

Satisfactory completion of pre-course work.

Also see NWCG Instructor Certification at the beginning of this Guide.

Course Level

Regional, state, or area

Course Description

This course is designed to equip an individual with the technical skills and knowledge needed to fulfill the role of Human Resource Specialist (HRSP) on emergency incidents. The primary purpose of the HRSP is to assist the Incident Command Team in maintaining a harmonious and professional environment by facilitating the resolution of a wide range of human resource issues.

Objectives

- Monitor incident activities for violations of appropriate practices and or activities that could lead to violations.
- Inform incident management that inappropriate practices or activities exist.
- Maintain appropriate visibility.
- Assist incident management by providing information on proper incident behavior.
- Advise incident management/supervisors on proper actions to take to alleviate inappropriate practices.
- Assist incident management in resolution of inappropriate acts or conditions by facilitating appropriate process.
- Participate in daily Incident Management Team briefings.
- Provide appropriate documentation of contacts made during the incident.

Course Components and Hours to Complete

Pre-selection assessment	N/A
Pre-course work	N/A
Online training	N/A
Instructor-led training	20
Total Hours	20

Target Group

Personnel desiring to be qualified as a human resource specialist (HRSP).

Minimum Instructor Qualifications

It is recommended the lead instructor be a geographic area HRSP coordinator.
Lead and unit instructors must be qualified human resource specialists (HRSP).
See Course Instructions for adjunct instructor recommendations.
Also see NWCG Instructor Certification at the beginning of this Guide.

Course Prerequisites

None

Course Level

Regional, state, or area

S-341, GIS SPECIALIST FOR INCIDENT MANAGEMENT

Annual

42-50 hours

Course Description

The GIS Specialist course is designed to meet the training needs of a Geographic Information Systems Specialist (GISS) to manage the information needs of all-hazard incidents managed with the Incident Command System (ICS). The course combines distance learning, lecture, discussion, individual exercises, and group exercises. The use of Geographic Information Systems (GIS) is one of the most efficient methods for documenting, analyzing, and managing information regarding the location of facilities, conditions, and environments affected by wildland fire, storms, floods, earthquakes, and other incidents.

Due to the technical nature of this course the materials are updated annually by the Geospatial Training Unit (GTU) of the Geospatial Subcommittee of NWCG. Course coordinators or lead instructors must contact the GTU Chair or S-341 Course Manager to obtain course materials (<https://www.nwcg.gov/committees/geospatial-training-unit/roster>).

NOTE: This course is a wildland fire course for individuals already proficient in GIS. It is not a course for individuals wanting to learn GIS. For additional information and locations of upcoming courses, refer to S-341 link at <https://www.nwcg.gov/committees/geospatial-training-unit/resources>

During the course students will:

- Describe the pre-season and pre-incident duties of the GIS Specialist and identify the equipment and data needs required for incident support.
 - Describe the dispatch and mobilization process and the procedures for incident check-in.
 - Demonstrate how to set up the GIS Specialist work area and organization to meet the needs of the incident management team.
 - Describe the incident planning cycle and the associated timeframes and product deadlines critical to GIS Specialist incident support.
 - Collect data, identify and use maps, orthoimagery, graphics, and other information to produce the required incident maps.
 - Discuss some examples of the more complex data analysis and manipulation commonly requested of a GIS Specialist.
- Utilize the established file structure and naming conventions to store, archive, and document all GIS Specialist incident activities.

Objective

Upon completing the course, students will have the knowledge and skills to respond to fire and all-hazard incidents and perform the minimum duties of a GIS Specialist trainee. This includes:

- Identify the basic supplies and data they will need on the incident.
- Create the basic maps required from the GIS Specialist on an incident within established timeframes.
- Establish and utilize a file structure, naming convention, and documentation to manage and archive incident data.

Course Components and Hours to Complete

Pre-selection assessment	3-6
Pre-course work	5-8
Online training	10-12

Instructor-led training	24
Total Hours	42-50

Target Group

Specialists and technicians actively using GIS in a land or resource management setting that are interested in utilizing those skills in wildland fire and all-hazard incident management. Candidates from all agencies involved in wildland fire and all-hazard incident management are encouraged to apply.

Minimum Instructor Requirements

Lead and unit instructors must be qualified and current GIS Specialist (GISS) and Geospatial Standard Operating Procedures on Incidents (GSTOP) practitioners.

Lead instructor must have served as a unit instructor in a previous course.

Also see NWCG Instructor Certification at the beginning of this Guide.

Course Location Objectives

Course locations are chosen by the GTU and the Geographic Area Training Representatives (GATR). Locations are based on various factors including, but not limited to, varied geographic area distribution, total cost, and local need for GISS trainees.

Course Prerequisites

- Working knowledge of the current version of ArcGIS. The course is designed for those with considerable experience working with ArcGIS. This is **NOT** a class on how to use ArcGIS.
- Adept at working within the directory structures in Windows and in the use of Windows Explorer file management and folder structures.
- Availability for dispatch to an incident as a GIS Specialist trainee within the next year. Availability includes supervisory approval and a personal commitment to support at least one incident.

Course Hardware Requirements

Selected students will be required to bring a notebook PC to the course capable of running the current version of ArcGIS commonly used by agencies.

Course Software Requirements

Software requirements include the current version of ArcGIS (Basic, Standard or Advanced) loaded and running on the computer you bring to the class. **Administrative rights to load software must be allowed in your laptop configuration.**

Course Level

Regional, state, or area

Course Description

This course prepares students to perform the job of facilities unit leader (FACL) as outlined in the PMS 310-1, Wildland Fire Qualification System Guide and the position task book developed for the position. The instructional methods of the course include lecture with PowerPoint presentations, classroom exercises, and discussions. The lessons provide an introduction to operational leadership, mobilization, arrival at an incident, risk management, safety and tactics, demobilization, and post-incident responsibilities.

Objective

- At the successful completion of this course, students will describe roles and responsibilities, and demonstrate proficiency in the skills/knowledge required to perform the tasks of a Facilities Unit Leader.

Course Components and Hours to Complete

Pre-selection assessment	N/A
Pre-course work	N/A
Online training	N/A
Instructor-led training	24
Total Hours	24

Target Group

Personnel desiring to be qualified as facilities unit leader (FACL).

Minimum Instructor Qualifications

Lead and unit instructors must be qualified as facilities unit leader (FACL).

Course Prerequisites

Qualified as base/camp manager (BCMG).

Course Level

Regional, state, or area

S-355, GROUND SUPPORT UNIT LEADER

2000

16 hrs

Course Description

This course is designed to prepare students to perform the duties of managing the transportation plan, maintenance and related services at an incident. Topics include gathering information about the assignment; organizing, staffing, and laying out the unit; field inspection of equipment; operation and coordination of the unit with other units, and demobilization.

Objectives

- Arrive at an incident properly equipped, gather information to assess the assignment and begin initial planning activities of a ground support unit leader (GSUL).
- Plan, staff, and manage the ground support unit to meet the needs of the incident in a safe manner.
- Coordinate with the logistics units and other sections to assist in accomplishing the overall objectives of the incident.
- Demobilize the ground support unit.

Course Components and Hours to Complete

Pre-selection assessment	N/A
Pre-course work	N/A
Online training	N/A
Instructor-led training	16
Total Hours	16

Target Group

Personnel desiring to be qualified as ground support unit leader (GSUL).

Minimum Instructor Qualifications

Lead and unit instructors must be qualified as ground support unit leader (GSUL).
Also see NWCG Instructor Certification at the beginning of this Guide.

Course Prerequisites

Qualified as equipment manager (EQPM).

Course Level

Regional, state, or area

Course Description

This course is designed to meet the training needs of a food unit leader (FDUL). Topics include information about the assignment, coordination, general information, safe food handling, national contract administration, alternate feeding methods, and demobilization. A significant portion of this course is devoted to examining the administration of the National Mobile Food Services Contract as it applies to the FDUL.

Objectives

- Arrive at incident properly equipped, gather information to assess the assignment, and begin initial planning activities of the food unit leader.
- Staff and organize the food unit to meet the needs of the incident.
- Coordinate with the logistics units and other sections to assist in accomplishing the overall objectives of the food unit.
- Identify safe food handling practices.
- Utilize the National Mobile Food Services Contract to ensure appetizing, well-balanced meals are provided to the government.

Course Components and Hours to Complete

Pre-selection assessment	N/A
Pre-course work	2
Online training	N/A
Instructor-led training	27-32
Total Hours	29-34

Target Group

Personnel desiring to be qualified as food unit leader (FDUL).

Minimum Instructor Qualifications

Lead instructor and unit instructors must be qualified as food unit leader (FDUL). Also see NWCG Instructor Certification at the beginning of this Guide.

Course Prerequisites

Satisfactory completion of pre-course work.

Course Level

Regional, state, or area

S-358, COMMUNICATIONS UNIT LEADER

2008

24 hrs

Course Description

This course is designed to provide skills and knowledge needed to perform in the role of communications unit leader (COML). Topics include mobilization, establishing the communications unit, communications system design and ordering, communications system installation and maintenance, communications equipment assignment and accountability, incident communications center, internal and external coordination, demobilization, and current communications issues and technology.

Objectives

- Identify the functions of the communications unit and the duties and responsibilities of the communications unit leader.
- Arrive at the incident properly equipped, gather information to assess the assignment, and begin initial planning activities of a communications unit leader.
- Plan, staff, manage, and demobilize the communications unit in a safe and effective manner to meet the needs of the incident.
- Coordinate with incident sections, appropriate communications, and other agencies and personnel to assist in accomplishing the overall incident objectives.
- Design, order, and ensure the installation and maintenance of all communications systems to support the incident.
- Maintain accountability of assigned communications equipment.

Course Components and Hours to Complete

Pre-selection assessment	N/A
Pre-course work	N/A
Online training	N/A
Instructor-led training	24
Total Hours	24

Target Group

Personnel desiring to be qualified as communications unit leader (COML).

Minimum Instructor Qualifications

Lead instructor must be a qualified communications coordinator (COMC).

Unit instructors must be qualified as communications unit leader (COML).

Also see NWCG Instructor Certification at the beginning of this Guide.

Course Prerequisites

Qualified as incident communications technician (COMT) and as incident communications center manager (INCM).

Course Level

Regional, state, or area

Course Description

This course is designed to provide the skills and knowledge needed to perform in the role of medical unit leader (MEDL). Topics include gathering information, organizing the medical unit, supervising the unit, evaluation, documentation, and demobilization.

Objectives

- Plan, staff, and manage the medical unit.
- Coordinate with other incident entities as necessary.
- Respond to medical emergencies and transport patients.
- Describe how to provide high quality patient care.

Course Components and Hours to Complete

Pre-selection assessment	N/A
Pre-course work	N/A
Online training	N/A
Instructor-led training	20
Total Hours	20

Target Group

Personnel desiring to be qualified as medical unit leader (MEDL).

Minimum Instructor Qualifications

Lead and unit instructors must be qualified as medical unit leader (MEDL).
Also see NWCG Instructor Certification at the beginning of this Guide.

Course Prerequisites

Current certification as Emergency Medical Technician (EMT) or equivalent.

Course Level

Regional, state, or area

Course Description

This course provides students with the skills necessary to perform as a helibase manager through facilitated discussions and group exercises. The final exercise is designed to give students a realistic helibase manager experience which prompts the student to communicate, resolve issues, and make decisions in support of an incident.

Objective

- Perform the tasks required of a Helibase Manager to develop, organize, and manage a helibase in given simulations and exercises to support incident activities.

Course Components and Hours to Complete

Pre-selection assessment	N/A
Pre-course work	8-12
Online training	N/A
Instructor-led training	28-32
Total Hours	36-44

Target Group

All personnel desiring to be qualified as helibase manager type 2 (HEB2).

Minimum Instructor Qualifications

Lead instructor must be a qualified helibase manager type 1 (HEB1).

Unit instructors must be qualified as helibase manager type 2 (HEB2).

Also see NWCG Instructor Certification at the beginning of this Guide.

Course Prerequisites

Qualified as helicopter manager, single resource (HMGB).

Satisfactory completion of pre-course work.

Course Level

Regional, state, or area

Course Description

This course prepares students to perform the job of helicopter manager. Unit lectures supported by PowerPoint slides and graphics are designed to facilitate class discussion and group exercises. The final exercise gives students a realistic helicopter manager experience; in addition to answering test questions, the student completes necessary forms required by the position.

Objective

- Perform the tasks required of a Helicopter Manager trainee. Through simulation and exercises, students obtain the skill to competently and safely manage a helicopter to support incident and project helicopter operations.

Course Components and Hours to Complete

Pre-selection assessment	N/A
Pre-course work	N/A
Online training	N/A
Instructor-led training	28-32
Total Hours	28-32

Target Group

Personnel desiring to be qualified as helicopter manager (HMGB).

Minimum Instructor Qualifications

Lead instructor must be a qualified helibase manager (HEB2).

Unit instructors must be qualified as helicopter managers (HMGB).

Also see NWCG Instructor Certification at the beginning of this Guide.

Course Prerequisites

Satisfactory performance as helicopter crewmember (HECM).

Course Level

Regional, state, or area

Course Description

This course leads students through the duties and responsibilities of the air support group supervisor (ASGS) and addresses aviation safety, risk management, airspace coordination, dispatch relations and coordination, fixed wing, rotor wing, and military operations. The desired outcome of this course is to prepare students to make the transition from being a type 1 helibase manager (HEB1) to an ASGS. A pre-course work assignment will familiarize students with the various reference materials used by an ASGS.

Objectives

- Perform the duties and responsibilities of the ASGS.
- Use risk management techniques to perform tasks safely.
- Coordinate airspace and build dispatch relations.
- Define the ASGS role as it relates to fixed wing, rotor wing, and military operations.

Course Components and Hours to Complete

Pre-selection assessment	4
Pre-course work	N/A
Online training	N/A
Instructor-led training	20
Total Hours	24

Target Group

Personnel desiring to be qualified as air support group supervisors (ASGS).

Minimum Instructor Qualifications

Lead and unit instructors must be qualified as air support group supervisors (ASGS).
Also see NWCG Instructor Certification at the beginning of this Guide.

Course Prerequisites

Qualified as helibase manager type 1 (HEB1).
Satisfactory completion of pre-selection assessment.

Course Level

Regional, state, or area

Course Description

This course is designed to meet the training needs of an air tactical group supervisor (ATGS), helicopter coordinator (HLCO), lead plane pilot, air tanker coordinator (ATCO), and aerial supervision module (ASM) crewmember as outlined in the Interagency Aerial Supervision Guide (IASG). Topics include aerial supervision program introduction, aerial supervision roles and responsibilities, administration, training, certification, currency, policies, incident aircraft, suppressants and retardants, aerial supervision mission procedures, aerial firefighting strategy and tactics, incident aircraft operations, all hazard incidents, and safety.

Objectives

- Describe procedures for safe and effective air traffic control over an incident.
- Describe efficient procedures for utilization of aircraft to meet incident objectives.
- Describe procedures for effective coordination between aviation and ground forces.

Course Components and Hours to Complete

Pre-selection assessment	1
Pre-course work	3
Online training	N/A
Instructor-led training	36-40
Total Hours	40-44

Target Group

Personnel desiring to be qualified as aerial supervisor in air tactical group supervisor (ATGS), helicopter coordinator (HLCO), lead plane, air tanker coordinator (ATCO), or aerial supervision module (ASM) crewmember.

Minimum Instructor Qualifications

Lead instructor must be a qualified air tactical group supervisor (ATGS).

Unit instructor cadre should include a lead plane pilot, airtanker pilot, helicopter coordinator (HLCO), state/regional aviation safety manager and/or air operations brand director (AOBD), operations section chief (OSC), and an incident commander type 3 (ICT3).

Also see NWCG Instructor Certification at the beginning of this Guide.

Course Prerequisites

Students must meet the position prerequisites for their respective Target Group positions above. Satisfactory completion of pre-selection assessment and pre-course work.

Course Level

Regional, state, or area

S-390, INTRODUCTION TO WILDLAND FIRE BEHAVIOR CALCULATIONS

2006

42-44 hrs

Course Description

This course is designed to introduce fire behavior calculations by manual methods, using nomograms and the Fire Behavior Handbook Appendix B. Students gain an understanding of the determinants of fire behavior through studying inputs (weather, slope, fuels, and fuel moisture). Students also learn how to interpret fire behavior outputs, documentation processes, and fire behavior briefing components.

Objectives

- List the assumptions, limitations, and appropriate uses of fire behavior prediction models.
- Describe how environmental factors and processes affect fire behavior predictions and safety.
- Define and interpret fire behavior prediction model inputs.
- Calculate fire behavior outputs using available fire behavior processors.
- Interpret, communicate, apply, and document wildland fire behavior and weather information.

Course Components and Hours to Complete

Pre-selection assessment	2
Pre-course work	8-10
Online training	N/A
Instructor-led training	32
Total Hours	42-44

Target Group

Personnel desiring to be qualified as division group supervisor (DIVS), prescribed fire burn boss type 2 (RXB2), or incident commander type 3 (ICT3).

Minimum Instructor Qualifications

Lead instructor must have completed Advanced Fire Behavior Calculations (S-490) and be a qualified division group supervisor (DIVS), incident commander type 3 (ICT3), or prescribed fire burn boss type 1 (RXB1); recommend the lead instructor be a qualified fire behavior analyst (FBAN).

Unit instructors must be qualified as strike team leader, task force leader, or prescribed fire burn boss type 2 (RXB2).

A meteorologist is highly recommended to instruct the weather sections of this course.

Also see NWCG Instructor Certification at the beginning of this Guide.

Course Prerequisites

Intermediate Wildland Fire Behavior (S-290).

Qualified as any single resource boss.

Satisfactory completion of pre-selection assessment and pre-course work.

Course Level

Regional, state, or area

Course Description

This course is designed to meet the training needs of a Safety Officer Type 1 (SOF1), Safety Officer Type 2 (SOF2), and Line Safety Officer (SOFR) on an incident as outlined in the Wildland Fire Qualification System Guide (PMS 310-1) and the position task book developed for the position.

Objectives

- Arrive at the incident, properly equipped, and gather information to assess the assignment and begin initial planning activities of a Safety Officer.
- Identify, prioritize, and mitigate hazards and risks on the incident.
- Plan, staff, and manage the incident safety action plan to meet the needs of the incident.
- Coordinate and plan with the command and general staff to assist in safely accomplishing the overall incident objectives.
- Ensure that the preparation of special reports for the final incident package and incident closeout with agency administrator is completed.

Course Components and Hours to Complete

Pre-selection assessment	N/A
Pre-course work	2
Online training	N/A
Instructor-led training	28
Total Hours	30

Target Group

Personnel desiring to be qualified as safety officer type 2 (SOF2).

Minimum Instructor Qualifications

Lead and unit instructors must be qualified as safety officer type 2 (SOF2).
Also see NWCG Instructor Certification at the beginning of this Guide.

Course Prerequisites

Qualified as division/group supervisor (DIVS).
Satisfactory completion of pre-course work.

Course Level

Regional, state, or area

Course Description

This course is designed to prepare students to function effectively in the position of a type 2 incident commander, command or general staff. The focus of this course is on the application of previously acquired knowledge and skills. Students will participate in two types of groups (teams and similar position) during exercises. These exercises include a simulation of the mobilization, management, and demobilization phases of a rapidly accelerating type 2 incident that has potential to become a type 1 incident.

Objective

- Students will perform the duties and responsibilities of their respective positions as team members on a type 2 incident.

Course Components and Hours to Complete

Pre-selection assessment	N/A
Pre-course work	2
Online training	N/A
Instructor-led training	36
Total Hours	38

Target Group

Personnel desiring to be qualified as incident commander type 2 (ICT2), or command or general staff positions.

Minimum Instructor Qualifications

Lead and unit instructors must be qualified as command or general staff type 2. Also see NWCG Instructor Certification at the beginning of this Guide.

Course Prerequisites

It is strongly recommended that the student has completed all prerequisite experience and course work to be qualified at the type 2 level as an incident commander (ICT2), command or general staff. Satisfactory completion of pre-course work.

Course Level

Regional, state, or area

Course Description

This course is designed to meet the training needs of the operations section chief type 2 (OSC2). This course is designed to be interactive in nature and contains several exercises designed to facilitate group and classroom discussion.

Objectives

- Explain the four elements of planning critical to the OSC: information gathering, strategy meetings, preparation of the Incident Action Plan (ICS 215), and the OSC role in demobilization.
- Discuss OSC supervision responsibilities that pertain to: operational period briefings, managing the operations section, risk assessment and safety management, and adjusting tactics.
- Describe the OSC role in external and internal coordination.

Course Components and Hours to Complete

Pre-selection assessment	N/A
Pre-course work	N/A
Online training	N/A
Instructor-led training	24
Total Hours	24

Target Group

Personnel desiring to be qualified as operations section chief type 2 (OSC2).

Minimum Instructor Qualifications

Lead and unit instructor must be qualified as operations section chief type 2 (OSC2).

Also see NWCG Instructor Certification at the beginning of this Guide.

Course Prerequisites

Qualified as division/group supervisor (DIVS).

Course Level

Regional, state, or area

Course Description

This course is designed to meet a portion of the training needs of the planning section chief type 2 (PSC2). Topics include information gathering, strategies, meetings and briefings, incident action plan (IAP), interactions, forms, documents, supplies, demobilization, and an optional technology section. In the final exercise, students observe a simulated planning meeting and use the information derived to find errors in an IAP. Students must pass the unit tests and the final exercise to successfully complete the course.

Objective

- The student will display the skills, knowledge, and tools necessary to perform the duties and responsibilities of the planning section chief type 2 (PSC2).

Course Components and Hours to Complete

Pre-selection assessment	N/A
Pre-course work	1
Online training	N/A
Instructor-led training	20
Total Hours	21

Target Group

Personnel desiring to be qualified as planning section chief type 2 (PSC2).

Minimum Instructor Qualifications

Lead and unit instructors must be qualified as planning section chief type 2 (PSC2).

Also see NWCG Instructor Certification at the beginning of this Guide.

Course Prerequisites

Qualified as any of the following: resources unit leader (RESL), situation unit leader (SITL), planning section chief type 3 (PSC3), operations section chief type 2 (OSC2), safety officer type 2 (SOF2), or logistics section chief type 2 (LSC2).

Satisfactory completion of pre-course work.

Course Level

Regional, state, or area

S-443, INFRARED INTERPRETER FOR INCIDENT MANAGEMENT

Pending Certification

36 hrs

Course Description

S-443 is typically offered once a year to provide students with the knowledge and skills required of an infrared interpreter (IRIN) as well as how and where the IRIN fits into the information flow of an incident. The students use infrared imagery from the Phoenix system to interpret and map the heat perimeter and heat concentrations, calculate acreage burned and produce summary products. Understanding of topographic map reading and basic fire behavior are preferred but not required. The course combines lecture/discussion and multiple exercises and there is a pass/fail final exam.

NOTE: Knowledge and skill in GIS is required for this course. Although some new functionality is presented, the student is expected to be comfortable working with, and creating products in, GIS.

Objectives

Upon completion of this course the student will have the knowledge, skills, and resources to support wildland fire incidents as an IRIN trainee. This includes:

- Understand capabilities and limitations of thermal infrared imagery.
- Interpret Phoenix infrared imagery to map heat perimeters and heat concentrations accurately on a topographic base.
- Produce GIS-ready shapefiles, kmz files, maps, and logs utilizing standard IR naming conventions for delivery to the incident.
- Establish and maintain proper communications with the SITL and others on an incident, dispatchers, IR pilots and technicians, and National and/or Regional IR coordinators.

Course Components and Hours to Complete

Pre-selection assessment	N/A
Pre-course work	4
Online training	N/A
Instructor-led training	32
Total Hours	36

Target Group

Federal, state, and local agency personnel with GIS skills interested in supporting wildland fire incidents. Candidates from all agencies involved in wildland fire management are encouraged to apply.

Minimum Instructor Qualifications

The National Infrared Program Manager is responsible for selecting the cadre for the course, and will typically serve as lead instructor. All instructors will be fully qualified IRINs with substantial incident experience as IRINs. This course is not available through the Publications Management System; for more information contact the National Infrared Program Manager, Tom Mellin (tmellin@fs.fed.us).

Course Prerequisites

- Working knowledge of the current version of ArcGIS. The course is designed for those comfortable working with ArcMap.
- Adept at working within the directory structures in Windows and in use of Windows Explorer file management and folder structures.

Course Level

Regional, state, or area

Course Description

The course is designed to meet the training needs of the incident training specialist (TNSP) on an incident as outlined in the PMS 310-1, Wildland Fire Qualification System Guide and the position task book developed for the position. The instructional methods of the course include lecture with PowerPoint presentations, classroom exercises, and discussions. The lessons include roles and responsibilities, initiating the incident training program, individual training plans, and incident training activities. Reference material is provided to assist students in the classroom and on the job.

Objectives

- Organize and implement an incident training program.
- Analyze and facilitate training assignments to fulfill individual development needs of trainees.
- Document individual trainee assignments and the incident training program.

Course Components and Hours to Complete

Pre-selection assessment	N/A
Pre-course work	3-4
Online training	N/A
Instructor-led training	14-18
Total Hours	17-22

Target Group

Personnel desiring to be qualified as training specialist (TNSP).

Minimum Instructor Qualifications

Lead and unit instructors must be qualified as training specialists (TNSP).
Also see NWCG Instructor Certification at the beginning of this Guide.

Course Prerequisites

Satisfactory completion of pre-course work.

Course Level

Regional, state, or area

Course Description

This course is designed to meet the needs of the Air Operations Branch Director (AOBD) position. Topics include preparedness and mobilization, initial briefings and meetings, transition, preparing and organizing for an aviation operation, implementation of an aviation operation, management and oversight of an aviation operation, and demobilization.

Objective

Perform the tasks required of an Air Operations Branch Director to mobilize and transition into an incident aviation environment, and be able to prepare for, manage, and oversee an aviation operation.

Course Components and Hours to Complete

Pre-selection assessment	N/A
Pre-course work	2
Online training	N/A
Instructor-led training	24
Total Hours	26

Target Group

Personnel desiring to be qualified air operations branch director (AOBD). It is recommended students have completed Advanced ICS (ICS 400) and Organizational Leadership in the Fire Service (L-480).

Minimum Instructor Qualifications

Lead and unit instructors must be qualified Air Operations Branch Directors (AOBD). Also see NWCG Instructor Certification at the beginning of this Guide.

Course Prerequisites

Qualified as Air Support Group Supervisor (ASGS).
Satisfactory completion of pre-course work.

Course Level

Regional, state, or area

Course Description

This course is designed to prepare students to become an interagency incident business advisor (INBA) resource for all-hazard incidents. Topics include preparation for an assignment, interactions/activities, and relationship to cost objectives.

Objectives

- Describe the basic framework of the INBA position.
- Understand the relationship between the agency administrator and the INBA.
- Identify the individual skills and abilities needed to perform as a successful INBA.

Course Components and Hours to Complete

Pre-selection assessment	N/A
Pre-course work	1
Online training	N/A
Instructor-led training	20
Total Hours	21

Target Group

Personnel desiring to be qualified as incident business advisor (INBA).

Minimum Instructor Qualifications

Lead and unit instructors must be qualified as incident business advisor (INBA).

Also see NWCG Instructor Certification at the beginning of this Guide.

Course Prerequisites

Experience working with complex organizations such as Area Command, Multi-agency Coordinating (MAC) Group, Unified Command, Federal Emergency Management Agency (FEMA),

OR

Experience working with incident management teams, interagency cooperators and additional support organizations during incidents,

OR

Satisfactory performance as a unit leader or section chief type 1 or type 2,

OR

Working incident business management knowledge acquired through incident assignments or as a business leader on an Agency unit.

Course Level

Regional, state, or area

Course Description

This course was developed using a **blended approach** to learning, meaning that it contains a mix of online and instructor-led training (ILT). Students are required to complete the online training portion of the course before taking the ILT.

S-482 is a course designed to meet the training needs of a Strategic Operational Planner (SOPL) on an incident as outlined in the National Incident Management System: Wildland Fire Qualification System Guide (PMS 310-1) and the position task book developed for the position.

The online component provides background (historical and foundational) information on why the SOPL position exists and the critical role the position plays in incident management. It also describes the typical responsibilities and activities a SOPL performs on an incident. In the instructor-led component, students apply the knowledge they gained in the online component (the “knowing”) to actual practice performing the typical activities of a SOPL (the “doing” or the “how-to”).

Objective

At the successful completion of this course, students will be able to:

- Perform basic tasks commonly required of a Strategic Operational Planner (SOPL) and possess the knowledge to successfully accomplish SOPL trainee assignments.

Course Components and Hours to Complete

Pre-selection assessment	N/A
Pre-course work	N/A
Online training	10-16
Instructor-led training	24
Total Hours	34-40

Target Group

Primary target group is personnel desiring to become qualified as a SOPL. However, this course may also be beneficial to agency administrators, incident commanders, fire management officers, and incident and unit staff who have direct fire planning and implementation responsibilities.

It is recommended that students have an introductory level of experience using the Wildland Fire Decision Support System (WFDSS) (e.g., navigating, finding situation awareness information, and locating approved Incident Decisions).

Minimum Instructor Qualifications

Lead and unit instructors must be a qualified SOPL and have experience in managing wildfires for the full range of protection and resource benefit objectives.

Also see NWCG Instructor Certification at the beginning of this Guide.

Course Prerequisites

None

Course Level

Regional, state, or area

Course Description

S-490, Advanced Fire Behavior Calculations, is the fourth course in a series designed to develop fire behavior and prediction knowledge and skills. This course prepares students for S-590, Advanced Fire Behavior Interpretation which addresses the skills for Fire Behavior Analyst and Long Term Fire Analyst positions. It also prepares students desiring to become qualified as a Prescribed Fire Burn Boss Type 1 (RXB1). The course material is presented in an instructor led approach to learning. Examples and exercises are divided between wildfire and prescribed fire applications. Students learn to project fire perimeter growth based on weather predictions, and knowledge of fuels and topography, using a variety of scenarios.

Objectives

- Collect and evaluate fire behavior prediction model inputs and compute wildland fire behavior using advanced techniques.
- Use fire behavior models to predict fire growth in varied terrain.
- Define likely conditions for extreme fire behavior and potential impacts on safety.
- Interpret, communicate, apply, and document wildland fire behavior and weather information.

Course Components and Hours to Complete

Pre-selection assessment	2-3
Pre-course work	2-4
Online training	N/A
Instructor-led training	40
Total Hours	44-47

Target Group

Personnel desiring to be qualified as a fire behavior analyst (FBAN), long term fire analyst (LTAN), prescribed fire burn boss type 1 (RXB1) or other fire personnel (including NWCG sponsored State, County, Municipal or Rural) who would benefit from this course.

Minimum Instructor Qualifications

Lead and unit instructors must be qualified as fire behavior analyst (FBAN), long term fire analyst (LTAN), or prescribed fire burn boss type 1 (RXB1).

Also see NWCG Instructor Certification at the beginning of this Guide.

Course Prerequisites

Successful completion of Introduction to Wildland Fire Behavior Calculations (S-390).

Proficiency using non-automated fire behavior processors:

- Nomograms
- Fireline Handbook, Appendix B

Proficiency using the latest computerized Fire Modeling System is required.

Course Level

Regional, state, or area

S-491, INTERMEDIATE NATIONAL FIRE DANGER RATING SYSTEM

Updated Annually

44 hrs

Course Description

The course develops the knowledge and skill to operate, maintain and manage the NFDRS at the local unit. Course lecture and exercises support practical and technical application of the intellectually complex subject matter. The course requires a computer classroom with Internet access to present.

Objective

- Upon completion of this course the student will demonstrate the knowledge and skills necessary to operate, apply, and manage the National Fire Danger Rating System.

Course Components and Hours to Complete

Pre-selection assessment	8
Pre-course work	N/A
Online training	N/A
Instructor-led training	36
Total Hours	44

Target Group

The course lessons and exercises support training for dispatchers and others charged with editing and inputting weather information into WIMS used for NFDRS calculations, fire management staff who apply NFDRS outputs to decision making, and fire behavior specialists who incorporate NFDRS products into assessments and projections.

Minimum Instructor Qualifications

In order to maintain consistency and oversight of course delivery, course coordinators must consult with the NWCG Fire Environment Curriculum Subcommittee when selecting lead instructors to present the S-491 course. See Roster for contact information. At a minimum, the lead instructor has general knowledge of the entire S-491 course material; has previous experience as a Lead Instructor or Unit leader for S-491; has broad experience applying NFDRS outputs; has the ability to relate each unit and lesson to the next and to the entire course; and is competent to teach any lesson in the course. The lead instructor shall be responsible for selecting the remainder of the cadre for the course. The subject matter of this course is highly technical and complex. The lead instructor shall make every effort to select the most qualified individuals to teach individual lessons and lead units, paying special attention to matching the instructor to the content and complexity of those units.

Unit and Lesson Instructors: At a minimum, has completed S-491, preferably has attended the Advanced NFDRS course. The unit leader must be competent in all the areas of emphasis within the unit, be able to teach any of the lessons or provide answers to detailed questions about the lesson's content, and provide leadership to coaches.

The lesson instructors should be competent and comfortable in presenting the content of the lesson, answering technical questions on the lesson subject matter, and have expertise with the course software sufficient to coach students through course exercises.

The ratio of instructors and coaches to students must be no less than 1:5 to insure availability of adequate coaching during exercises.

Computer Specialist

It is essential that a computer specialist either be one of the cadre members or be immediately available to the course presentation to resolve any computer, network or printing problems encountered. Persons selected to fill this capacity must be thoroughly familiar with the hardware (personal computers, network, Internet connection, printers, projector) used in presenting the course, with directory structures used, and to a lesser extent the software and its installation.

Course Materials

Course coordinators or lead instructors should contact the Fire Environment Curriculum Subcommittee to obtain most recent course materials. See Roster for contact information.

Course Prerequisites

- Demonstrate at least intermediate skills with the current Windows™ operating system.
- Successful completion of Intermediate Wildland Fire Behavior (S-290).
- Possess a valid Weather Information Management System (WIMS) and Wildland Fire Management Information system (WFMI) logon identification.
- Current and comprehensive working knowledge of WIMS (the WIMS course is strongly recommended to attain this prerequisite knowledge)
- Successfully complete the pre-selection assessment with a minimum passing score of 70% or higher.

Course Level

Regional, state, or area

Course Description

This course was developed using a **blended approach** to learning, meaning that it contains a mix of online and instructor-led training (ILT). Students are required to complete the online training portion of the course prior to taking the ILT.

The primary purpose of this course is to provide the knowledge base for developing short-, mid-, and long-term geospatial fire analysis for the long term analyst (LTAN) and fire behavior analyst (FBAN). This course conveys the latest processes and technology to assess weather, climatology, historic fires, fuels, and biophysical attributes to develop deterministic and probabilistic fire growth for various timeframes. Concepts taught will help an LTAN and FBAN perform at an acceptable level on a national basis without regard to geographic boundaries. The course is presented by distance learning, lectures, electronic presentations, and class discussion.

Objectives

- Prepare future LTANs with advanced geospatial fire analysis, interpretation and application skills, preparatory for S-590.
- Introduce future FBANs to geospatial fire analysis, interpretation and application skills preparatory for completing task book items related to geospatial analysis.
- Equip technical specialists with geospatial fire analysis, assessment, and interpretation skills.
- Provide continuing education to qualified LTANs, FBANs, and technical specialists by providing the most recent advancements in geospatial fire analyses.

Course Components and Hours to Complete

Pre-selection assessment	4
Pre-course work	N/A
Online training	116
Instructor-led training	40
Total Hours	160

Target Group

- Personnel desiring to be qualified as long-term analyst (LTAN) or a technical specialist in geospatial analysis (GIST) or fire behavior analyst (FBAN) completing position task book items relating to spatial fire analysis.
- Qualified LTANs, FBANs, and technical specialists seeking training on recent advancements; personnel using fire behavior models to assist in fuels planning, fire planning or ecosystem restoration; line officers faced with fire management decisions; incident commanders; and personnel preparing data for analysis.

Minimum Instructor Qualifications

Lead and unit instructors must be qualified as long-term analyst (LTAN), fire behavior analyst (FBAN), incident meteorologist (IMET), technical specialist, or GIS specialist with verified fire experience developing geospatial fire behavior analyses or providing data for such analyses. Lesson instructors must have applied experience with the materials being presented. Also see NWCG Instructor Certification at the beginning of this Guide.

Course Prerequisites

Advanced Wildland Fire Behavior Calculations (S-490).
Intermediate National Fire Danger Rating System (S-491)
Satisfactory completion of pre-selection assessment.
Students not seeking certification can access the online self-paced lessons without prerequisites.

Course Level

National

Course Description

Using classroom lecture and simulated incidents, students will understand the role and function of a Type 1 Incident Management Team, the applicability of management principles to the incident management job, and the special considerations of incident management within geographic areas of the nation.

The Complex Incident Management Course (CIMC) was developed in conjunction with S-520 Advanced Incident Management. The two courses were co-developed around similar course and lesson objectives and content; they are interchangeable. For additional information on CIMC, go to the NAFRI Web site.

Early Nomination Rationale: Early nomination has been requested to give those nominated the necessary mentoring and pre-work assignments for the course.

Objective

Given a simulated complex fire situation, students will effectively perform functional and team responsibilities. Individual performance must meet established criteria for successful completion of the course.

Course Components and Hours to Complete

Pre-selection assessment	N/A
Pre-course work	20
Online training	N/A
Instructor-led training	40
Total Hours	60

Target Group

Any person qualified to fill a national level interagency Type 1 Incident Management Team position as incident commander, planning section chief, operations section chief, logistics section chief, finance section chief, safety officer, or public information officer, or any person desiring to become certified in one of these positions at the Type 1 complexity level.

Minimum Instructor Qualifications

This course is managed by a National Steering Committee. Nationally recognized subject matter experts and practitioners serve as instructors in this course.

Course Prerequisites

Individuals must be functionally certified and qualified at the Type 2 level for the position they will be filling at the course. Nominations must be submitted with a current fire qualifications record and with a narrative statement giving a brief background of the person nominated. Include a description of the intended use of the skills developed as a result of attending S-520.

Satisfactory completion of pre-course work.

Course Level

National

For current course information, refer to the NAFRI Web site at <https://www.nafri.gov>.

Course Description

This course was developed using a **blended approach** to learning, meaning that it contains a mix of online and instructor-led training (ILT). Students are required to complete the online training portion of the course prior to taking the ILT.

S-590 is an intensive course designed to provide prospective FBANs and LTANs with the groundwork they will need to succeed throughout the training process. The course focuses on the interpretation of fire behavior products and emphasizes the importance of communicating this information effectively. Ensuring the operational relevance of fire behavior information and inclusion of operational concerns into forecasts and briefings is highlighted as a key skill to providing useful input for both tactical and strategic decisions as well as being critical to fire fighter safety. The course focuses on the interpretation of fire behavior outputs and models on a variety of time scales ranging from immediate operational concerns to answering longer term strategic questions.

S-590 is a highly interactive class with full participation required from all students. Course material is presented through a combination of online material and exercises. The residence portion of the class addresses key topics interspersed with in depth fire scenarios. During the fire simulations, students will produce products, briefings and documentation under tight time constraints as they would on a fire assignment.

Class size is limited to 50 participants.

Objectives

- Describe the FBAN/LTAN responsibilities and interactions with managers, management teams, meteorologists, and others.
- Demonstrate skills in analyzing, interpreting, displaying, and communicating fire behavior information and its implications.
- Demonstrate the ability to effectively communicate orally and in writing appropriate wildland fire behavior predictive information.
- Recognize the importance of and demonstrate the ability to prepare fire behavior documentation.

Course Components and Hours to Complete

Pre-selection assessment	4
Pre-course work	4
Online training	8
Instructor-led training	64
Total Hours	80

Target Group

Personnel desiring to be qualified as fire behavior analyst (FBAN) and or long term fire analyst (LTAN) in wildland fire management operations. **Nominees must identify which position(s) they are targeting on their nomination form.**

Minimum Instructor Qualifications

This course is managed by a National Steering Committee. Nationally recognized subject matter experts and practitioners serve as instructors in this course.

Course Prerequisites

Students seeking qualification as a **fire behavior analyst (FBAN)**:

Training Prerequisites

- Advanced Wildland Fire Behavior Calculations (S-490)

Position Prerequisites

- Division group supervisor (DIVS)

Students seeking qualification as a **long term fire analyst (LTAN)**:

Training Prerequisites

- Advanced Wildland Fire Behavior Calculations (S-490)
- Intermediate National Fire Danger Rating System (S-491)
- Geospatial Fire Analysis, Interpretation and Application (S-495)

Position Prerequisites

- Fire effects monitor (FEMO)
- Firing boss, single resource (FIRB)

Pre-Selection Assessment

All nominees will need to successfully complete a pre-selection assessment that requires proficiency in the skills taught in S-490. This is a 4 hour time limited and proctored test. Proficiency in the use of BehavePlus is critical to passing the S-590 pre-selection assessment.

Mentoring Program

An active mentoring program exists for FBAN and LTAN mentees to gain experience prior to attending S-590. S-590 Steering Committee, Geographic Area Coordinating Groups, Training Representatives and Coordination Centers work together in the priority placement of mentees with qualified FBANs and LTANs. Participation is not mandatory but has proven to assist confidence in the classroom. After getting support from your supervisor and unit Training Officer, contact your Geographic Area Training Representative to get more information about the mentoring program. The S-590 Course Coordinator may also assist with concerns or issues regarding the mentoring program.

For this program to be successful the following actions must occur:

- Geographic Area Coordinating Groups (GACG) must take a nationally consistent and active role in the identification, prioritization and nomination of candidates.
- Current fire behavior analysts (FBAN) and long-term fire analysts (LTAN) take an active role in the mentoring of identified candidates.
- Mentoring opportunities provide candidates with meaningful experiences as Behave technical specialists, geospatial analyst (GSAN) and as FBAN and or LTAN trainees.

Computer Requirements

All participants attending S-590 will need to provide their own laptop, portable printer and data cable. Students should be equipped with the hardware (laptop & printer), and software to function as an FBAN and or LTAN and be self-sufficient at the course as if they were in the field. A detailed listing of hardware and software needs will be included in the course selection letter.

Additional Information

Success in S-590 will depend on the student's communication skills, both written and oral.

Additional skills could be obtained by completing the following:

- Facilitative Instructor (M-410) or other public speaking and technical writing courses.
- Participating in the S-590 Mentoring Program.
- Instructing portions of Advanced Fire Behavior Calculations (S-490) course.
- Attending Geospatial Fire Analysis (S-495), Interpretation and Application course.
- Review of and practice with the BehavePlus program.

S-590 is a national level training course and as such participants can expect long days.

Course Level

National

For additional information refer to the NAFRI Web site at <https://www.nafri.gov>.

Course Description

Using classroom lecture and simulated incident, students will understand principles and concepts of Area Command, and understand the interaction of Area Command and other incident organizations, agencies, and political entities.

Objective

Given a simulated multi-incident fire situation, students will effectively perform functional and team responsibilities. Individual's performance must meet established criteria for successful completion of the course.

Course Components and Hours to Complete

Pre-selection assessment	N/A
Pre-course work	N/A
Online training	N/A
Instructor-led training	36
Total Hours	36

Target Group

Personnel in wildland fire agencies that will be available to participate on a national interagency Area Command team as an area commander, assistant area commander logistics, assistant area commander planning or area command aviation coordinator.

Minimum Instructor Qualifications

This course is managed by a National Steering Committee.

Course Prerequisites

Individuals must be qualified at the Type 1 level and have successfully completed S-520 or CIMC, except for the Area Command Aviation Coordinator who must complete the position task book prior to attending. Nominations must be submitted with a narrative statement giving a background of the person nominated. Include a description of the intended use of the skills developed as a result of attendance at S-620.

Course Level

National

X-900, INVESTIGATING POWER LINE CAUSED WILDFIRES

2013

6 hrs

Course Description

This course will provide a basic knowledge of the specific requirements and protocols necessary to investigate wildfires caused by electric power lines and their related equipment. Detailed sections will provide specialized information and techniques to aid in the investigation of power line related wildfires. The Course can be presented by short lectures and electronic presentations or as a self-study course using the DVD.

Objectives

- Describe the basic structure of the electric utility industry and how to safely work around power lines and their related equipment during fire investigations.
- Recognize the different classifications of electrical lines, hardware, and their associated equipment, including exempt and non-exempt models and related clearance requirements.
- Describe construction requirements, industry standards, and maintenance procedures required to prevent wildfire starts from electrical power lines and power line related equipment.
- Understand the conditions when “spoliation of evidence” may occur and how to avoid this situation.
- Recognize the various power line fire causes and evidence associated with these causes.

Course Components and Hours to Complete

Pre-selection assessment	N/A
Pre-course work	N/A
Online training	N/A
Instructor-led training	6
Total Hours	6

Target Group

Qualified wildfire investigators.

Minimum Instructor Qualifications

Cadre must have experience in wildland fire investigation.

Also see NWCG Instructor Certification at the beginning of this Guide.

Course Prerequisites

Successful completion of Wildland Fire Observations and Origin Scene Protection for First Responders (FI-110) and Wildland Fire Origin and Cause Determination (FI-210).

Course Level

Local
